

# Kewtech KT65DL Multifunctional Tester

Product Images

Product Code: C00-7654

## Short Description

---

### KEY BENEFITS

- Easy to use - straight forward interface
- 0.001 Ohm high current loop test for when you are close to the supply transformer
- PAT testing capability with download when used in conjunction with the Kewtech PAT ADAPTOR 1
- Best loop performance accuracy when benchmarked against other brands
- Selectable Max Zs tables for MCBs and Fuses so you can automatically compare with measured result on site
- Conducts 55V loops so your centred tapped 110V systems can be tested
- No Bangs - continuous live monitoring means no blown fuses or PCBs
- UK specific RCD test, all six results are presented on one screen - unlike other international brands where you have to scroll
- Advanced memory means that you can tag a measurement to a site, distribution board, circuit number and type of test - for instance was that loop test a Ze or Zs?
- Proven, accurate and reliable
