Tempo AirScout GigaCheck

Product Images   **Product Code: C00-4687**

Short Description

Wifi coverage and Ethernet speed validator

Description

As the demand for faster networks grows, service providers must ensure their customers receive the speeds they pay for, but struggle to easily verify the service level agreements.

The AirScout® GigaCheck offers service providers a quick and easy way to help validate their SLAs and meet customer expectations.

How it works:

The AirScout GigaCheck unit, controlled via smartphone app, connects directly to a customer's residential gateway. It then tests WiFi coverage and verifies the upload and download speeds of the wired Ethernet connection in real-time, all the way up to 1 gigabit.

Technicians can also easily test WiFi speeds up to 1.3 Gbps from different areas of the home to ensure the customer is getting the performance they expect, where they expect it. The intuitive user interface of the mobile app and cloud based reporting tool makes it easy to generate, view, and send reports – giving you and your customers and access to the most up to date information.

WiFi® Test

Simple, One-Click Connection to Wireless Routers for Testing up to 1.3 Gbps

Signal/Noise/SNR Measurements

Transmit and Receive Success Rates

PHY Rate

Upload/Download/Ping

Ethernet Test

Upload Speed up to 1 Gbps

Download Speed up to 1 Gbps

Ping

Features

"Headless" Unit is Fully Integrated with Smartphone App (Android)

Report Generation and Cloud Access

Easy to Read Pass/Fail Indicators

Powered by Industry Standard Speedtest® by Ookla®

Rechargeable Li-Ion Battery

Supplied with AC/DC Universal Power Supply and Carrying Case.
