

Dismantling Knife 180mm

Product Images

Product Code: H87-2348

Short Description

Insulated Dismantling Knife with a 38mm sickle shaped blade with guide shoe at blade point for no damage of the conductor insulation.

Formerly Z19-0437EM

Description

Designed to take the outer jacket off of common wires such as Romex and SO cables, the Knipex dismantling knife features an ergonomically improved handle shape with comfortable slip guard that's insulated to 1,000 volts.

This dismantling knife's solid, fixed hook blade has two cutting blades - one on the outside and another on the inside turning point - as well as a guide shoe that's designed to slide along the inside conductors of the wire and prevent nicking or damaging the inner conductor.

A thumb recess and "finger hook" at the end of the handle ensure a good transmission of force when the blade is pulled. The blade is constructed from surgical-grade, air-hardened stainless steel.

Features

Ergonomically designed handle shape with comfortable slip guard

Confident grip thanks to slip-proof soft components

Thumb recess and "finger hook" at the end of the handle ensure a good transmission of force when the blade is pulled

Transparent protective cap

Blade: surgical steel, stainless, vacuum-hardened

Handle: Insulating multi-component handle, VDE-tested

Insulation standard: IEC 60900 DIN EN 60900

Blade length: 38 mm

Radius: 23,5 mm

Length: 180 mm

Weight: 68 g
