

Mills Pitmate Kit

Product Images

Product Code: S83-9326

Short Description

Comprising the Mills Polemate / Pitmate Splicer's Work Tray, Mills Pitmate Mobra Arm Bracket and Mills Polemate / Pitmate CBT Arm

Description

The Polemate and Pitmate range of products and accessories have been specifically designed in conjunction with telecom engineers to assist field operational staff with the installation of telecommunication equipment.

The Pitmate system comprises an adjustable bracket which can be fixed easily to the Mobra frame to which splicing trays and cable reel stands can quickly and easily be attached providing a stable platform whilst on site.

Now available as a kit and comprising:

S83-7629 Mills Polemate / Pitmate Splicer's Work Tray

A purpose made splicers tray that simply slots into the S83-7626 Pitmate Mobra Arm Bracket providing a firm work support for both joint, splicer, cleaver and associated tools. It features an aperture to securely hold the BT/OPENREACH One Fibre Overhead Joints' (CMJ and MMJ) at the correct working height during building and splicing activities.

Dimensions: Width 508mm x Depth 408mm x Thickness 2mm.

S83-7626 Mills Pitmate Mobra Arm Bracket

An adjustable bracket which can be fixed easily to the Mobra frame. The bracket can then accept the Mills Polemate / Pitmate Splicer Work Tray or S83-7431 Mills Polemate / Pitmate General Work Tray, which then provides a firm work support for both joint, splicer, cleaver and associated tools. The bracket can be adjusted to 6 different heights by use of the captive pin in 80mm increments, starting from a minimum height of 150 mm to a

maximum of 550mm .

S83-7624 Mills Polemate / Pitmate CBT Arm

A specialist 500mm long bracket for use with the installation and controlled de-reeling of CBT Cable Reel Assemblies up to a diameter of 830mm.

The arm can be easily clip into the S83-7626 The Pitmate Mobra Arm Bracket for underground applications.

The CBT Arm System allows the reel to be unreeled in a controlled manor due the interference fit of the spindle flanges.
