

Ripley Miller DLS 650 Dual LED Source

Product Images

Product Code: C00-0304

Short Description

The Ripley Miller DLS 650 optical LED source provides multiple wavelength options to meet modern fibre optic testing needs. The base model outputs 850 and 1300nm wavelengths in either single or dual mode.

Description

The Ripley Miller DLS 650 optical LED source provides multiple wavelength options to meet modern fibre optic testing needs. The base model outputs 850 and 1300nm wavelengths in either single or dual mode.

When combined with the RP 560 model optical power meter, this LED source can greatly reduce the time needed to test fibre cables with its automated wavelength switching feature. The unit periodically switches between available wavelengths, and the power meter recognises each time the switch occurs, allowing multiple loss tests to be completed simultaneously.

Easy removal of the included SC adaptor allows the light source ferrule to be cleaned, preventing contamination of test jumpers.

Features

- Small form-factor for fast, simple testing in the field
- Single output port ensures faster switching when testing at multiple wavelengths
- NIST-traceable LED output
- 2kHz, 1kHz, and 270Hz tone modulation
- Supplied with AA batteries
