

Mills Deluxe Technician Tool Case

Product Images

Product Code: B72-0049

Short Description

A professional smart, stylish technician's case specially designed with the field service engineer in mind.

Description

A professional smart, stylish technician's case specially designed with the field service engineer in mind.

This lightweight yet hard-wearing briefcase style tool case is manufactured from impact resistant polypropylene combined with a strong aluminium frame.

The case also benefits from a pre-formed, three section base tray, three heavy duty hinges and two anti-burst Travel Sentry Approved toggle locks and is supplied with a comfort grip handle giving the case a carry capacity of up to 30kg

This lid side tool board has 16 elastic loops and 25 pockets to securely accommodate 15 screwdrivers and 14 pliers or a combination of both.

The base board has 21 elastic straps of varying sizes, 9 open pouches, 1 sealable pouch and has clips and a heatsink for soldering iron storage
