

Sumitomo FC-8R-F Precision Auto Blade Rotation Cleaver

Product Images

Product Code: FC-8R-F

Short Description

One step optical fibre cleaver with automatic blade rotation. Supplied with AP-FC8 single fibre adaptor,

Description

The FC-8R is Sumitomo Electric's newest one step optical fibre cleaver with automatic blade rotation. It is the ideal tool for use in fusion splicing, field termination, or any application that requires precision in a confined space.

It has a simple cleaving operation that can be performed in the palm of the hand, allowing the user to take the cleaver to fibre in limited slack or cramped applications. A built-in extra large fibre scrap collector handles scrap fibres resulting from the cleaving process.

With each cleave, the blade is automatically rotated to a new scoring position on the cleaver blade.

This automatic blade rotation feature ensures that the user receives the maximum number of precision cleaves from each cleaver blade.

Features

- 1 to 12-Fibre Ribbon Cleaver
- Automatic Blade Rotation
- Ideal Cleaver for Mechanical Connectors
- Ideal Cleaver for High Volume Precision Cleaving Applications in Any Environment
- Compatible with All Sumitomo Electric Fusion Splicers
- Precision Blade Performs 60,000 Cleaves

Supplied with AP-FC8 single fibre adaptor, Desktop Spacer and CC-8RSH semi-hard case
