Type IIR Disposable Face Mask Pack of 50

Product Images Product Code: S26-1728

Short Description

Pack of 50 Type IIR disposable face masks with ear loops, designed to help in the prevention of the spread of germs and viruses by the wearer.

These masks also assist in preventing the wearer from touching their nose or mouth with hands that could have potentially picked up pathogens from contaminated surfaces.

Description

Pack of 50 Type IIR disposable face masks with ear loops, designed to help in the prevention of the spread of germs and viruses by the wearer.

These masks also assist in preventing the wearer from touching their nose or mouth with hands that could have potentially picked up pathogens from contaminated surfaces.

- The dual non-woven inner and outer layers complete with non woven filter provide a combined three-layer construction
 - · Features ear loop fasteners
 - Supplied in a pack of 50 masks

Please note that these masks are not Personal Protective Equipment (PPE) respirator masks.

Therefore they have not been certified to comply with the requirements for PPE respirators as defined in European Standard EN 149:2001+A1:2009

Respirators or filtering face pieces (FFP) are designed to protect the wearer from exposure to airborne contaminants (e.g. from inhaling infectious agents associated with inhaling small and large particle droplets).

Please note that these masks are not medical grade face masks (also known as surgical or procedural masks).

Therefore they have not been certified to comply with the requirements for medical face masks as defined in European Standard EN 14683:2014.

Medical face masks are designed to limit the transmission of infective agents between hospital staff and their patients, by helping to reduce and/or control at the source the spread of large respiratory droplets from the person wearing the face mask.
