

1/4 Inch Hex to 1/2 Inch Square Drive Adaptor

Product Images

Product Code: G70-1769

Short Description

For use on 1/2-inch square drive sockets and is suitable for drills with standard 3 jaw chucks

Description

The SDS plus Adaptor is highly robust and is specially designed to withstand the high power of rotary hammers.

Its S2 Modified Steel and optimised heat-treatment process provide the adaptor with extra endurance for high performance, making it extremely sturdy for long-lasting work.

This makes the product ideal for heavy-duty screw-driving applications such as plant installations or heavy industrial work. .

It fits on 1/2-inch square drive sockets and is suitable for drills with standard 3 jaw chucks
