

Mills Subduct Pulling Eye (WUD Carrot / Grip Threaded)

Product Images

Product Code: S13-1825

Short Description

Designed to install polyethylene ducting (sub duct) using a 100mm long screw-in tapered

thread which will grip ducts with an inner diameter of 12 to 22mm. These 'grips threaded' have cutting edges which actually make a thread in the bore of the ducting, similar to using a tap to cut a thread in steel. To ensure a reliable grip we recommend 7 or 8 full threads of contact.

The Mills WUD Carrot has a 'Type A' male thread for direct fitting to the female end of the No1 and No2 Ferret Duct Rods (S83-1446 and S83-0711). These subduct 'pulling eyes' are manufactured from hardened steel and have been zinc plated to provide corrosion resistance.
