

Including three different series, the OFDC family accepts a wide range of distribution and drop cables thus responding to virtually all application requirements.

Each series has a common housing that can be configured to handle different connectivity solutions; such as splice-only, pre-connectorized drop cables, and field-installable connectors (FIC)—significantly simplifying training.

Modularly built, it allows easy integration of optical components, even at later deployment stages, and easy pass-through cabling. Advanced gel sealing technology ensures fast and easy field handling without a need for special tools.

The field friendly design can be installed in pedestal, hand hole, pole or strand mount applications for fast and easy integration into the FTTx network. Strand, Ped and Pole mount bracket accessory kits are also available for easy installation

## **Features and Benefits**

Advanced gel sealing technology ensures fast and easy field handling without a need for special tools  
Individual access to drop cable connection area and separate zones for looped cable storage for most cable types

Compact and modular design suited for wraparound drop cable installation, enabling faster deployments

Allows easy pass-through cabling and integration of optical components, even at later deployment stages

## **Specifications**

### Main Cable Types

Feeder cables: 2

Round: 5-15 mm

Branch cables: 2

Round: 4-11 mm

### Drop Cable Types

Drop cables: 8

Round: 0-5.5 mm

Flat: 8 x 4.5 mm

Drop cables: 16

Round: 0-5.5 mm

### Splice capacity & use (Type: SMOUV 45mm)

72 splices for repair up to 96

### Patch capacity

8 SC / 16 LC

## Dimensions

Height: 128 mm

Width: 156 mm

Length: 324 mm

**This is a configurable product. Please see ordering guide image and call sales for further details.**

## Description

---

CommScope offers the industry's most versatile Outdoor Fiber Distribution Closure (OFDC) family. Including three different series, the OFDC family accepts a wide range of distribution and drop cables thus responding to virtually all application requirements.

Each series has a common housing that can be configured to handle different connectivity solutions; such as splice-only, pre-connectorized drop cables, and field-installable connectors (FIC)—significantly simplifying training.

Modularly built, it allows easy integration of optical components, even at later deployment stages, and easy pass-through cabling. Advanced gel sealing technology ensures fast and easy field handling without a need for special tools.

The field friendly design can be installed in pedestal, hand hole, pole or strand mount applications for fast and easy integration into the FTTx network. Strand, Ped and Pole mount bracket accessory kits are also available for easy installation
