

# Mills Optic Cable Pulling Lubricant 20 Litre

Product Images

Product Code: S27-1959

## Short Description

---

Mills Optic Cable Pulling lubricant is a water-based thin semi gel cable installation lube for fibre cable pulling operations. It is ideal for pulling both fibre optic cables and sub ducts, eliminating up to 80% friction.

It's easy to apply and has a clingy consistency which adheres perfectly to cables in wet weather providing a resistance to washing off in water filled ducts.

Mills Optic Cable Pulling lubricant is a non-flammable, non-toxic and substantially biodegradable cable lubricant with high elasticity for reduced consumption. In addition the lube dries slowly to form a thin friction reducing film which retains its slip allowing additional cable installs or removals from the same duct at a later date.

This premier cable lubricant does not contain salt, detergent or grease which can degrade cable jackets and offers no threat to the environment.

Supplied in a 20 litre bucket for use with cable lube pump 2a S83-0709.

Replaces S83-2665, C00-1564, S83-2667 and S83-2666
