

Mills Fibre Blowing Microduct Lubricant 0.25 Litre

Product Images

Product Code: S27-1962

Short Description

A specialist cable blowing lubricant more concentrated than the Mills Fibre Blowing Subduct lubricant (S27-1960 & S27-1961) and is designed for use with microducts. This lower viscosity lubricant spreads further and is ideal for microducts, delivering a very thin coating reducing friction and increasing blowing length.

This cable blowing lubricant is water based white liquid and is non-flammable, non-toxic and substantially biodegradable. In addition, the lube dries slowly to form a thin friction reducing film which retains its slip allowing additional cable installs or removals from the same duct at a later date.

Supplied in a small 0.25 litre resealable bottle for easy application.

Description
