

Mills Fibre Blowing Microduct Lubricant 1 Litre

Product Images

Product Code: S27-1963

Short Description

A specialist cable blowing lubricant more concentrated than the Mills Fibre Blowing Subduct lubricant (S27-1960, S27-1961) and designed for use with microducts. This lower viscosity lubricant spreads further and is ideal for microducts delivering a very thin coating reducing friction and increasing blowing length.

This cable blowing lubricant is a water based white liquid and is non-flammable, non-toxic and substantially biodegradable.

In addition, the lube dries slowly to form a thin friction reducing film which retains its slip allowing additional cable installs or removals from the same duct at a later date.
