

# Martindale HPAT400 Pass/Fail PAT Tester

## Product Images

Product Code: C70-2072

## Short Description

The HPAT400 HandyPAT is an easy to use battery powered, hand-held PAT tester with simple one-button test selection. Its lightweight portable design makes it ideal for testing in all locations whether under a desk or testing a wall mounted monitor.

A single button press activates either a full Class I, Class II or lead test without any further interaction required by the user, unless a failure is encountered.

The display has clear PASS/FAIL indicators but does not display test values. Simple connection diagrams are permanently shown on the case body making it easy to start testing straight away.

The HPAT400 delivery contents include an extension lead adaptor, an earth bond probe

with clip, 6xAA alkaline batteries and a "TEST & GO" carry case with separate pocket for accessories.

Compact portable design with backlit display  
Easy one button testing  
Automatic Class I, Class II & power lead tests  
Clear and simple PASS/FAIL indication  
IT safe 200mA earth bond test

### Specifications

Default pass level

Lead:  $\geq 1.0 \text{ M}\Omega$

Class I:  $\geq 1.0 \text{ M}\Omega$

Class II:  $\geq 2.0 \text{ M}\Omega$

Fuse test

Voltage: 4V DC (open circuit)

Current: 200mA DC (short circuit)

Pass level:  $>2\text{mA}$

Overload protection 300V AC/DC

Complies with BS EN 61010

Temperature range  $-10$  to  $40^{\circ}\text{C}$

Supply 6 x 1.2V AA alkaline batteries

Dimensions 90 x 210 x 54mm

Weight 700g (inc batteries & leads)

Includes TC57 carry case, alkaline batteries, EX332 IEC lead, TL67 earth bond probe and manual
