

C.Scope Rodding Oscillator Sonde 33KHz

Product Images

Product Code: S83-2058

Short Description

This CScope rodding adaptor is a 33KHz Duct Sonde which is battery operated and just 24mm in diameter. It screws onto either Duct Rod No1 or No2 via a Duct Adaptor 2A (S83-0712)

In addition an attachment Rod 4a (S13-0720) can be screwed onto the leading thread of the sonde, to act as a guide

This allows the route of the duct to be traced using a Cat Style Locator. The exact point of a blockage can be identified using this system with enormous cost saving potential.
