Mills – your partner in Smart Energy Installation

With a background in the supply of tooling for engineers going back over 100 years, Mills has the experience and capability to meet all evolving needs for specialist tooling for the installation of **smart meters, electric vehicle charging points, solar panel installations, heat pumps and wind turbines**. Operating as both a distributor and, in many cases, manufacturer, Mills can offer an off-the-shelf solution for all specialist tooling requirements whilst being constantly involved in the development of new products for a specific marketplace.

With Mills, you're so much more than a customer

We also know a thing or two about customer satisfaction having spent the past century building our reputation for exceptional service and customer care. When it comes to going the extra mile, we're there already!

Smart Meters

Government estimates predict that the average household with a smart meter can be expected to save hundreds of pounds on their energy bill during the smart meter rollout, because of better tariffs and an improved ability to see how much energy homes are actually using. This adds up to a saving of £5.6 billion across the UK with an equivalent saving of 45 million tonnes of CO2 emissions, allowing us to cut carbon emissions and reduce wastage on a national scale.

Electric Vehicle Charging Points

The Government has announced plans to accelerate a greener transport future through a 2-step phase-out of petrol and diesel cars. Step 1 sees the phase-out date for the sale of new petrol and diesel cars and vans brought forward to 2030 and Step 2 will see all new cars and vans be fully zero emission at the tailpipe from 2035. The move is underpinned by over £1.8 billion to support greater uptake of zero emission vehicles for greener car journeys with new measures announced including more chargepoints to build on our world-class infrastructure network, alongside innovation for new clean technologies. This investment will improve air quality in our towns and cities, and support economic growth

right across the UK, putting us at the forefront of the zero-emission vehicle revolution. £1.3 billion has been made available to accelerate the roll-out of chargepoints for electric vehicles in homes, streets across the UK and on motorways across England, so people can more easily and conveniently charge their cars.

Solar Panels

Generate cheap, green electricity from sunlight

Over **one million UK homeowners** have now switched to solar panels to power their homes with free, clean energy generated by the sun. Improved efficiency and advancements in technology mean that solar panels can be fitted almost anywhere and can take the form of glass, roof tiles, slates, membranes and more.

A typical home solar PV system could **reduce electricity bills and save around one tonne of carbon annually**, depending on where you live in the UK. According to the International Energy Agency (IEA), Solar PV generation increased by a record 179 TWh (up 22%) in 2021 to exceed 1000 TWh. It demonstrated the second largest absolute generation growth of all renewable technologies in 2021, after wind. Solar PV is becoming the lowest-cost option for new electricity generation in most of the world, which is expected to propel investment in the coming years.

Heat Pumps

The UK Government has ruled that gas boilers will be banned in all new homes built after 2025. The 'Future Homes Standard' will require all new builds to have low-carbon systems, such as electric heat pumps.

The ruling is part of the government's initiative to help the UK reach its target of net-zero carbon emissions by 2050. From 2021 all new homes will be expected to achieve a 31% reduction in carbon emissions. It plans to offer grants to help over 90,000 households install heat pumps through its £450 million Boiler Upgrade Scheme. About 85% of UK homes use gas boilers for heating, making it one of the most polluting sectors of the economy. The fossil fuels used in our homes make up over a fifth of the UK's carbon emissions, meaning low-carbon alternatives are critical if the UK hopes to meet climate targets. As gas boilers are phased out, it is estimated 600,000 new heat pumps could be installed by 2030.

Wind Turbines

Renewable energies such as wind play an important role in decarbonising our economy and slowing climate change. Wind power is one of the largest sources of renewable electricity in the UK so will be important in meeting the government target of "Net Zero" greenhouse gas emissions by 2050. In 2019, turnover from wind energy was nearly £6 billion. Turbines work by converting the kinetic energy of the wind into mechanical energy. Generators connected to the turbines then convert this mechanical energy into electrical energy.

PART NO. DESCRIPTION

S00-8015	XTEND & CLIMB TELESCOPIC LADDER
----------	---------------------------------

KING KOMBO LADDER 3-IN-1 EXTENSION LADDER

King Kombo is the world's first and only 3-in-1 extension ladder, leaning ladder and stepladder combination, in one lightweight package.

This 3-in-1 ladder is manufactured from non-conductive Hi-Visibility green fibreglass and features ultra-heavy-duty feet to ensure traction and durability for harsh industrial environments. The King Kombo also benefits from a V groove top rung when extended for accessing poles and corners.

Wide-flared side offers superior side-tip stability and the ladder has a maximum load capacity of 150kg.

The King Kombo is available in 3 heights as follows:

- A) 2 Section 5 Rung, closed Length 1.5 metres, extended Length: 2.6 metres giving an approx Working Height: 3.1 metres. Weight: 9kg

RIDGEGEAR RGL31 LADDER RESTRAINT LANYARD

This short lanyard has been specifically designed for ladder restraint when a shorter lanyard is required. The two attachment points can be used to adjust the length between the operator and the ladder when climbing.

The restraint lanyard can only be used for work-restraint because there is no shock absorption built into the system and it should never be used to extend another fall-arrest product.

37kN polyester webbing is used to manufacture this product complete with a water repellent coating which helps give the product a longer life.

Accredited to: EN 354:2010

Material: 26mm water repellent polyester

Fittings: RGK11SL and RGK2

Max arrest force:

Lengths: 0.56m, can be reduced to 0.44m

Restraint only - not to be used as fall arrest

The ROTOR WTG Rescue System has been configured to meet the exacting requirements of the renewables sector.

The ROTOR rescue system is fully rated for 2-person descent and sealed in a barrel for corrosion resistance meaning it can be safely stored on site.

At the core of the wind turbine rescue system is the ROTOR rescue and evacuation descender, an intuitive device which allows self-evacuation automatically limited maximum descent speed or controlled lowering or raising of a casualty. The ROTOR can control rope speed in either direction, meaning that repeated descents can be carried out in quick succession.

High rated load with long descent distance:

Load	Max. descent distance	Descent speed
140 kg	4500 m	0.7 m/s
200 kg	500 m	1.0 m/s
250 kg	220 m	1.7 m/s

The ROTOR can also lift in either direction using the ratchet handle supplied. With the locking mechanism engaged the load is held if the handle is released. The ROTOR can change from lift to lower (and vice versa) at any point whilst under load.

ROTOR WTG rescue system also includes edge protector – constructed of durable stainless steel for corrosion resistance for exposed locations.

The rescue system is supplied in a robust protective case.

Available with 50m, 60m and 100m rope lengths

C) HEIGHTEC ADVANCED LIFTING AND LOWERING KIT

The advanced lifting and lowering kit is designed to lift small loads and is ideally suited to the renewables, construction and telecoms industries.

The PRISM rope control device provides a hands-free locking function and can be changed from lift to lower whilst under load.

The HURRICANE hauling device allows a pulley system to be added or removed quickly and easily. Unique, patented device available only from Heightec.

Additional pulley can be used for redirection or increasing mechanical advantage as required.

Comes complete with the versatile KARI 30 transport bag. Heightec's KARI bag range is tough, waterproof and suitable for storage and hauling. Designed specifically for work at height and rescue, the KARI transport bag range brings all the features of traditional dry bags but with increased protection.

The advanced lifting and lowering kit comprises:

- PRISM descender / rope control device
- HURRICANE hauling device
- 50 mm Pulley
- 11 mm diameter rope with sewn terminations for safety & strength
- Load rated KARI 30 bag
- 120cm protected sling x 2
- Triple action alloy karabiners x 3

*Use 2 kits to produce a hauling system with tensioned pilot line.

Available in 50m and 100m lengths.

F) Triple Lanyard for 2.7kg Tools - 1.0 to 1.4m

Premium quality triple lanyard with three interchangeable tool ends that have 25cm (10 inch) webbing loops with dual channel locks and HK clips for quick tool changes.

This tool lanyard is specifically designed to be attached securely at one end to a hand tool, and the other end to a structure or a worker's belt or harness. It extends up to 1.4 metres and withstands defined load limits while being easily used by a worker, who may find themselves in a position in which an accidentally dropped tool could cause unwanted damage, injury or death.

The lanyard has a heavy-duty karabiner end and is rated for tools up to 2.7kg.

It is made from 2cm (0.78in) webbing with an internal shock cord and extends from 100-140cm (41-56in).

Features:

- Rated for tools up to 2.7kg in weight
- High visibility 1/2" webbing with internal shock cord
- 10" Webbing loop with dual-channel lock for secure tool attachment
- Karabiner belt attachment
- Convenient webbing loop for belt attachment

Specifications:

- Material: Nylon
- Length: 41-56 in
- Weight: 0.15 kg

WATERPUMP PLIER WITH SOFT JAWS 245MM

Designed for use on decorative or bright plated fittings that can be easily damaged using conventional steel jaws.

The jaws are adjustable for securing a variety of shapes to a maximum of 40mm with eight positions.

Manufactured from chrome vanadium steel hardened, tempered and chemically blacked.

Has 'no - nip' feature which prevents handles locking together and damaging users' hands.

Cushion - grip handles.

Supplied with replacement set of soft jaws.

A) OPEN ENDED WRENCH SET

Supplied in woven canvas type toolroll and comprising:
6 x 7mm, 8 x 9mm, 10 x 11mm, 12 x 13mm,
14 x 15mm, 16 x 17mm, 18 x 19mm and 20 x 22mm

Mills open end wrenches are manufactured using high-specification precision drop forging which ensures uniform steel grain structure providing optimum strength. Mirror finish.

B) COMBINATION WRENCH SET

Supplied in woven canvas type toolroll and featuring "Profile Drive" on the ring end to prevent damage to workpiece and provide better operator safety. The Mills combination wrenches are manufactured using high-specification precision drop forging which ensures uniform steel grain structure providing optimum strength.

Comprising: 6, 7, 8, 9, 10, 12, 13, 14, 15, 17, 19, 22 and 24mm.

C) RATCHETING COMBINATION SPANNER

Open end set at 15°. HI-TORQ® ring end manufactured with 72 teeth ratcheting mechanism. Forged from Chrome Vanadium steel, hardened, tempered, chrome plated. Length 132mm. Available 7, 8, 10 and 13mm.

D) 6 PIECE FLEXIBLE RATCHET SPANNER SET

These Chrome Vanadium spanners have flexible ratchet heads, which can turn through 180°, allowing them to be used in more awkward locations to reach places at any angle. Each spanner has a 72 fine-tooth mechanism. A useful arrow illustration is etched in the spanner to indicate the direction of torque. 180° head for access into tight places. 5° Fine Ratchet Mechanism. This set comprises the following sizes: 8mm, 10mm, 13mm, 15mm, 17mm and 19mm.

E) PASS-THRU ADJUSTABLE RATCHET WRENCH SOCKET 11 PIECE SET

The Crescent X6™ Pass-Thru™ Adjustable Wrench is a versatile fastening tool that offers multiple fastening options in a single tool design.

For pipework, the jaw reverses. Simply back the jaw out, turn it around and re-insert. Serrations on the inside edge form a deep tooth pattern that hold the pipe tight and reduce slipping.

The universal design allows it to fit 6 fastener types: Hex, Square, 12 Pt., E-TORX, Rounded Hex and Spline.

Includes: 10 Universal Combo Sockets that fit both standard and metric fasteners: 3/8in (10mm), 7/16in (11mm), 15/32in (12mm), 1/2in (13mm), 9/16in (14mm), 19/32in (15mm), 5/8in (16mm), 11/16in (17mm), 23/32in (18mm) and 3/4in (19mm). Wrench Length: 200mm / 8"

F) 'GO THROUGH' METRIC SOCKET SET 10-22MM 19 PIECE

Socket set manufactured from Chrome Vanadium steel hardened and tempered with a polished finish. The unique hollow socket technology of the 'Go Through' ratchet and socket is ideal for long fixings. The sockets are "edge" driven. This allows a fixing to pass through the head and avoid the depth restriction of conventional socket and ratchets. Supplied in a tough storage case with soft grip handle.

Contents: 13 x 'Go Through' sockets: 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22mm. 1x Reversible fine tooth ratchet. 3x Extension bars 38, 75, 150mm. 2x Socket converters 20mm x 1/4" Square Drive and 20mm x 3/8" Square Drive.

G) NORBAR NORTORQUE TETHERED TORQUE WRENCH 1/2IN SQUARE DRIVE

The Norbar NorTorque® Tethered Torque Wrenches are accurate up to ± 3%. They feature a built-in tethering point to secure the tool for safe work at height and a double-sided locking plunger square. Versatile design with a micrometer scale for simple and error free setting.

Pinned head in line with DROPS recommendation for ultra-safe handling of sockets when working at height.

Supplied with a Declaration of Conformance, which meets the requirements of ISO 6789-1:2017.

A) MAGNETIC BASE SPIRIT LEVEL 240MM

Magnetic 3 vial die cast boat level for working tight areas and benefiting from horizontal, vertical and 45 degree vials. This torpedo level has a milled base with flush mounted magnets permitting hands-free measuring on steel surfaces. The solid acrylic vials are accurate to $\pm 1\text{mm}$ per metre.

Length 240mm.

**B) POCKET SPIRIT LEVEL**

Compact 125mm long aluminium body with pocket clip holder. Ideal for use when fitting surface mount back boxes or similar in confined spaces.

**CONTRACTOR**
Just the job**C) PLUMB LINE**

Supplied with 18m of orange line, the plumb bob is 115mm long with a diameter of 18mm and weighs 113g.

**D) MASON LINE 76.2M 250FT FLUORESCENT PINK**

Suitable for staking out sites, concrete and landscaping layout and brick/block laying.

A) MILLS EXTRA HEAVY DUTY 7.5M TAPE MEASURE

Exceptionally robust tape measures with rubberised shells capable of withstanding the most harsh working conditions.

The yellow power return blade is easily locked by a positive lever action. All tapes are fitted with metal belt clips. The extra wide blades are very clearly marked in 1/16ths and mm. This 7.5m (24ft) tape measure features a 25mm (1") wide blade.

B) MILLS CONTRACTOR 5M/16FT TAPE MEASURE

The 5m/16ft Retractable Tape Measure is a heavy duty 25mm width tape with positive blade lock and strong belt clip. It has a rubberised case capable of withstanding most harsh working applications. The yellow dual scale blade measures cm/mm as well as 1/4"/1/16", and has a 3 rivet 10mm deep hook for securing to a work piece during measurement. A wrist strap is provided as standard for security, during measurement.

C) FATMAX XTREME TAPE MEASURE

- Blade armour coating on the first 150mm reduces the risk of breaking the tape
- Huge standout of almost 4 metres for easy one person measuring
- 32mm wide blade makes reading the numbers easy
- Cushion grip provides sturdy, slip-resistant hold
- Mylar coated blade is up to 10 times more resistant to abrasion than normal lacquered blades
- Belt clip

D) NON CONDUCTIVE TAPE MEASURE 3M

Fully insulated, non-conductive 3m tape measure ideally suited for use by electricians and those working within close proximity to electricity. Metric and imperial. Proof tested to 20kV.

E) CLOSED ABS FIBREGLASS LONG TAPE 30M (100FT)

Fibreglass 30m/100ft Tape featuring a 13mm wide blade clearly marked in both metric and imperial measurements.

The tape is stored in a tough closed ABS case with a hand strap and a folding metal rewind handle, with a rotating winding knob that allows the tape to be quickly rewound after use.

This 30m/100ft Fibreglass Long Tape has both metric and imperial measurements.

F) FOLDING RULE 1000MM

Plastic construction with clear metric and imperial graduations. 4 folding sections for convenient storage. Length 1m.

G) MILLS MEASURING WHEEL

Ideal for the precision measurement of roads, pavements or land up to a distance of 9999.9 metres. This distance measuring surveyors wheel has a folding handle with retaining clip making it easy to store, and further benefits from a quick retractable foot stand.

Product Features:

- Long distance measuring wheel with foldable handle
- Perfect for surveyors, builders and cabling installers
- One person operation: automatically records measurements as you walk, simply press the "Reset" button and start walking
- Counter adds when moving forward and subtracts when reversing
- Strong, foldable, tubular steel handle with retaining clip
- Clear and easy to read
- Wheel Diameter: 31.8cm (12.5")
- Overall Length: 104cm
- Weight: Approx 2.3kg

H) GREEN CHALK MARKING TOOL

The Green Chalk Marking Tool contains 250+ bursts of removable fluorescent green pigment, and is capable of marking (non permanently) all surfaces including brick, metal, wood, pebbledash, porcelain and ceramic.

MAGNA CLEANSE RAPID FLUSH FILTER KIT

Fast and effective central heating system flushing with ongoing protection.

Features:

- Removes virtually ALL suspended black iron oxide in ONE pass.
- System flushing could now be achieved in as little as TWO hours.
- Effective system flushing results with ongoing protection.
- Cleanser remains concentrated within the system throughout the process.
- Cleanser remains heated within the system throughout the process - More effective.
- Saves water - Disposal ONLY at the end of the process.
- Effective, ongoing protection for the boiler for improved performance and efficiency.

Comprises:

- MagnaCleanse RapidFlush Filter
- MagnaCleanse adaptor
- VibraClean
- 2 x Female cam locks
- 2 x Hose lengths
- 2 x Valve and cam lock assembly
- Drain valve
- 6 x Supra clamps
- Lid spanner

PIPELAGGER PRO COMPLETE KIT

PipeLagger Pro is an easy to use multi-functional cutting system for a perfect finish on every job. PipeLagger Pro has been purposely designed with the plumbing and heating installer in mind to eliminate second guess work, minimise wastage and reduce installation time.

The pre-formed adjustable profiles accommodate a multiplicity of wall thicknesses, whilst overcoming a diversity of pipework configurations.

Pipe Lagger Pro Kit has been purposely designed to be light, durable and easy to use. Frequent sharpening of the saw blade is required; this will ensure smooth and clean cuts.

PipeLagger Pro Complete Kit contains:

- PipeLagger Pro Profiler
- PipeLagger Pro Lagging Saw
- Saw Guard, Blade Sharpener

BRAZING

A) Rothenberger Super Fire 2 Brazing Torch. Fast and effective brazing torch for all soldering and brazing applications.

- Concentrated, high heat, anti flare, adjustable flame
- Turbine flame pattern
- Instant Piezo ignition
- Can be used at any angle
- Use with any MAP/PRO or Propane disposable cylinders

B) MAPP Gas Cylinder for Superfire 2. Special gas mix for high-performance soldering work. Flame temperatures up to 2,700 °C and 35 % faster than propane. MAPP® is a registered trademark of Messer Group GmbH, Bad Soden.

C) Rothenberger Heat Guard For Superfire 2 Quick Fire and Jet Torch. Heat deflector guard ideal accessory or use with the Super Fire 2 Brazing Torch (S99-7386) to prevent scorching of walls and skirting boards, etc whilst working.

D) Rothenberger Support Stand for Gas Cylinders. Supports Propane and MAPP gas cylinders to prevent them toppling over when set down. Simple to fit and increases user safety. For use with Rothenberger Propane and MAP/PRO Gas Cylinders.

E) Rothenberger Turbine Flame Burner Torch Tip. Designed to produce the hottest flame for the S99-7386 SuperFire 2 but also capable of being effective at lower outputs for tasks such as soft soldering, brazing, laying felt roofs etc

F) Rothenberger Propane Gas Cylinder 400g. Propane gas cylinder possesses a high flame temperature of up to 1995°C, making it suitable for a range of general purpose soft soldering and brazing tasks. For use with the S99-7386 SuperFire 2.

BOSCH GMS 120 METAL MULTI DETECTOR

The GMS120 Professional metal detector from Bosch is the most reliable multi-detector in its class. Automatic calibration means that all objects are found and application errors are avoided and the GMS 120 provides reliable detection even of deep-lying objects - up to a depth of 12cm. The bargraph display zooms in as an object is detected which, along with the three colour luminous ring, gives even more reliable detection of objects.

- Pinpoint indication of the object

BOSCH D-TECT 120 PROFESSIONAL DIGITAL WALLSCANNER

High performance, multi detecting professional radar scanner complete with a dual power source. Precise centre finder with visual direction guidance. Spot measurement enables detection on extremely small surfaces.

Operated using standard alkaline batteries, making this practical for outdoor use when there is no way to recharge a battery pack.

Can detect objects including plastic water pipes, metals or live cables at material depths of up to 120mm. Audible and visual warning signals when objects are detected in the wall.

- Detection depth, steel, max. 120 mm
- Detection depth, copper, max. 120 mm
- Max. detection depth 120 mm

PART NO. DESCRIPTION

P09-6128 BOSCH D-TECT 120 PROFESSIONAL DIGITAL WALLSCANNER

3-IN-1 DETECTOR STUD METAL & LIVE WIRE

The detector can be used to detect and locate wooded studwork, metal and AC voltage, providing a clear indication of concealed objects using the LED and buzzer indicator system. A marking groove is also provided at the top of the detector so that the surface can be marked prior to any drilling, nailing or screwdriving.

Approximate detection depths:

Stud mode: Wood stud of 30x30mm: ≤14mm.
Metal mode: Iron pipe of dia. 25mm: ≤25mm.
AC mode: Typical depth of 50mm for 90-250V at 50-60Hz.

BOSCH GSH 5 CE S.D.S-MAX BREAKER

The Bosch GSH 5 CE S.D.S-Max demolition hammer (110v) has a powerful 1150W motor which delivers 8.3 J of impact energy for a high material removal rate. It's lightweight with Vibration Control for effortless and continuous work in time-intensive applications.

- Rated Power Input 1150 w
- Lightweight design for comfortable handling in extensive applications
- S.D.S-Max chuck for maximum power transmission and tool-free chisel changes
- Speed preselection for applications which require material-specific speed
- Receive constant speed under load thanks to electronic regulation
- Vibration Control: rubber mounting and foam padding in the handles significantly reduces vibration for increased safety and comfort
- Robust metal components and optimised lubrication system ensure that this Bosch S.D.S hammer is durable
- Available in 110 and 240 Voltages
- Weight 6.1kg

HSS DRILL BIT SETS

A range of three popular HSS drill bit sets in robust cases. Industrial grade metric drill bit in high speed HSS steel for accurate and easy drilling of all metals, special and hardened steels and alloys. The jobber drills comply with BS328, Din338 and ISO 235/1.

A) HSS 18pc drill bit set (1-10mm) in robust 'Toughbox' case

Contains sizes 1, 1.5, 2.5, 3.5, 4.5, 5, 5.5, 6, 7, 8, 9, 10 and 2 x (2, 3 and 4mm).

B) HSS 19pc drill bit set (1-10mm) in robust 'Toughbox' case

Contains sizes 1.0, 1.5, 2.0, 2.5, 3.0, 3.5, 4.0, 4.5, 5.0, 5.5, 6.0, 6.5, 7.0, 7.5, 8.0, 8.5, 9.0, 9.5 and 10.0mm.

C) HSS 19pc drill bit set (1-10mm) in robust steel case.

Contains sizes 1.0, 1.5, 2.0, 2.5, 3.0, 3.5, 4.0, 4.5, 5.0, 5.5, 6.0, 6.5, 7.0, 7.5, 8.0, 8.5, 9.0, 9.5 and 10.0mm.

D) HSS 25pc drill bit set (1-13mm) in robust steel case.

Sizes: 1, 1.5, 2, 2.5, 3, 3.5, 4, 4.5, 5, 5.5, 6, 6.5, 7, 7.5, 8, 8.5, 9, 9.5, 10, 10.5, 11, 11.5, 12, 12.5 and 13mm.

E

E) HSS 13pc bit set (1.5-6.5mm) in robust steel case.

Contains sizes 1.5, 2.0, 2.5, 3.0, 3.2, 3.5, 4.0, 4.5, 4.8, 5.0, 5.5, 6.0 and 6.5mm.

HSS COBALT TWIST DRILL BIT SETS

The HSS Twist Drill Bit Cobalt provides long-lasting performance when drilling stainless steel. This drill bit works with alloyed and non-alloyed steel, stainless steel, cast iron, cast steel and acid- and heat-resistant steels. The HSS Twist Drill Bit Cobalt is manufactured to DIN 338. The drill bit is Type N (flute angle) with a 135-degree tip providing centring without wandering.

F) HSS Cobalt 25pc drill bit set (1-13mm) in robust steel case.

Contains sizes 1.0, 1.5, 2.0, 2.5, 3.0, 3.5, 4.0, 4.5, 5.0, 5.5, 6.0, 6.5, 7.0, 7.5, 8.0, 8.5, 9.0, 9.5, 10.0, 10.5, 11.0, 11.5, 12.0, 12.5 and 13.0mm

G

G) HSS Cobalt 13pc drill bit set (1.5-6.5mm) in robust steel case.

Contains sizes 1.5, 2, 2.5, 3, 3.2, 3.5, 4, 4.5, 4.8, 5, 5.5, 6 and 6.5mm

H

H) HSS Cobalt 18pc drill bit set (1-10mm) in robust steel case.

Contains sizes 1.0, 1.5, 2.0, 2.5, 3.0, 3.5, 4.0, 4.5, 5.0, 5.5, 6.0, 6.5, 7.0, 7.5, 8.0, 8.5, 9.0, 9.5 and 10.0mm.

BOSCH 6 PIECE SELFCUT SPEED SPADE DRILL BIT SET 13, 16, 19, 20, 22, 25MM

The Self-Cut Speed Spade Bit performs extremely fast hole drilling. Its self-feeding threaded tip enables the drill bit to effortlessly pull itself into the wood for high-speed drilling with little exertion. Fast chip removal for rapid results is made possible by the specially shaped spade. Up to 3 x faster than a standard spade bit, it is suitable for use on soft and hard wood, light building materials and plasterboard. This spade bit has a 1/4-inch hex shank system and it is best for use with portable power drills.

Set Includes:

13, 16, 19, 20, 22, 25mm x 152mm long, with quick chuck fitment.

Set dimensions: 195.0 x 185.0 x 15mm.

BOSCH 6 PIECE SELFCUT FLAT SPADE WOOD BIT SET IN WALLET 13-25MM

Sizes included 13, 16, 19, 20, 22, and 25mm with 1/4" hex shank.

These drill bits have self-feeding precision ground tips and cutting edges for accurate dimensional stability.

They are able to drill three times faster than standard spade bits.

Made in accordance with own factory standards to DIN 3126 - E 6 from specially toughened steel.

Drill bit colour: Grey, sand blasted.

Total Length: 152mm

Working Length: 112mm

S.D.S PLUS MULTICUT MULTIPURPOSE DRILL

An ideal alternative to an S.D.S wood auger, and more forgiving if you encounter masonry or metal whilst drilling – ensure your power tool is switched to rotary use only when using these universal bits.

For precision rotary drilling in tiles, natural stone, metal, wood and plastics.

Features:

Carbide tip: Extra sharp cutting edges, so very well suited for metal too

Patented 4-step profile: Fast drill dust feed when drilling into masonry and concrete

Shank: S.D.S+

Diameter: 6.5mm

Length overall: 450mm

Comprising: 22, 29, 35, 44, 51 and 64mm holesaws, 2 arbors, pilot and ejector spring.

B) Electricians holesaw set

Comprising: 16, 20, 25, 32, 40 and 51mm holesaws, 1 arbor, pilot and ejector spring.

C) 9 piece hole saw set

Bosch 9 Piece Holesaw Set for cutting wood or metal, made from HSS bi-metal with 8% cobalt alloy for extreme resilience and long sharp working life. The set includes 6 Saws ranging in sizes from 20mm to 64mm, a power change adaptor, 2 x HSS-G pilot drill bits and a hard plastic carry case.

D) 14 piece hole saw

Bosch 14 Piece Holesaw Set for cutting wood or metal, made from HSS bi-metal with 8% cobalt alloy for extreme resilience and long sharp working life. The set includes 11 Saws ranging in sizes from 19mm to 76mm, a power change adaptor, 2x HSS-G pilot drill bits and a hard plastic carry case.

E) 9-piece HSS bi-metal holesaw set for electricians 20 - 64 mm

Made of bi-metal HSS containing 8% cobalt alloy for long-lasting cutting.

Bi-metal Hole Saw fits all standard adaptors on the market.

Comprises: 6x holesaw sizes: 20 / 25 / 32 / 38 / 51 / 64mm with 2 x associated arbors.

F) 7 Piece Diamond Core Drill Kit

N36-3060- 7 Piece Diamond Core Drill Kit for cutting clean holes in brick and concrete blocks. Ideal for plumbing, electrical, engineering installation and general building tasks.

Set contains:

- 3 x Diamond Cores with 8mm Turbo Segments: 38mm, 52mm, and 117mm
- 1 x S.D.S Plus Extension Adaptor 10mm x 200mm.
- 1 x Hex Extension Adaptor 12mm x 200mm.
- 1 x A-Taper Pilot Drill 10mm x 200mm.
- 1 x Extractor Drill Key.
- 1 x Carry Case.

BSI FIRST AID KITS

From January 2019 BSI standards have been issued for the provision of First Aid within the workplace - BS 8599-1:2019.

The British Healthcare Trade Association (BHTA) has devised kits that more closely reflect potential accidents in the workplace. These kits have become the British Standard Kits for workplaces in the UK and are a clear way for an employer to meet their obligations, the kits include a large range of items in various quantities, including: plasters, burns dressings, blankets, bandages and wipes.

We offer the following kits in 3 options:

A) Travel and Motor First Aid Kit- 240 x 160 x 50mm

B) Small Workplace First Aid Kit- 1-10 Person 225 x 235 x 95mm

C) Medium Workplace First Aid Kit- 11-20 Person 280 x 290 x 110mm

FASTER. SAFER. SIMPLER.

FAST AND EASY TO INSTALL

No need for plugs, screws and washers – just drill your hole, slide our clip over the cable, and push it into the wall.

Drill a hole in your substrate. We suggest a Ø6mm hole at a depth of 30mm.

Slide the clip over the cable. Make sure it's seated in the rounded area of the clip.

Compress and push it home. Pinch the legs together and push into the hole by hand.

THE INDUSTRY STANDARD

MILLS STAINLESS CABLE TIES

Stainless steel cable ties are ideal for all applications that require high strength, reliability and fire resistance. In the event of a fire, cables will remain securely held in place and will not fall to block emergency exits.

These ties have a locking feature and offer infinite adjustment within their length. The ties are heavy duty and once installed they can be opened and re-used if required.

It is strongly recommended that these cable ties are applied using the S57-4257 Cable Tie Gun for Stainless Steel Ties or S00-5631 Tensioning Tool to ensure reliable and efficient fixing.

Available in 4 popular sizes:

- A) S00-5620 127mm x 4.6mm Pk 100
- B) S00-4685 201mm x 4.6mm Pk 100

A) EYEBOLT EXPANDING 1A

A dropwire fixing consisting of a Zinc plated steel eyebolt with an M6 thread. This is the preferred method of attaching a dropwire to brickwork at end users' premises. Overhead single point fixing bolt. Ring size 12mm. Required hole size 12mm x 50mm. Ref: 016445.

B) EYEBOLT EXPANDING 2A

A dropwire fixing consisting of a Zinc plated steel eyebolt with an M10 thread. This is the preferred method of attaching a dropwire to the end users premises, where the walls are rendered. Ring size:14mm. Required hole size: 16mm diameter x 95mm depth. Box 20. Ref: 016442 / 021689 / 023041.

C) M8 EYEBOLT

Eyebolt M8 x 95mm for use with Catenary Wire Kits (R02-7028) and associated accessories.

Provides temporary or permanent anchorage in stone, concrete or brickwork. Supplied with shield, washer and hex nut.

D) EYEBOLT EXPANDING 2B

A dropwire fixing consisting of a Zinc plated steel eyebolt with an M10 thread and a length of 205mm. This is the preferred method of attaching a dropwire to the end users premises, where the walls are clad. Ring size 23mm ID with 40mm OD.

E) EYEBOLT EXPANDING 2C

A dropwire fixing consisting of a Zinc plated steel eyebolt with an M10 thread and a length of 255mm. This is the preferred method of attaching a dropwire to the end users premises, where the walls are heavily clad. Ring size 23mm ID with 40mm OD.

EXTECH DV25 VOLTAGE DETECTOR WITH FLASHLIGHT

The DV25 from Extech Instruments is a pocket size Non-Contact Voltage Detector with two selectable ranges.

- Non-contact detection of AC Voltage in 2 ranges:
 - 24 to 1000VAC
 - 100 to 1000VAC
- For use on 50/60Hz circuits
- Audible and Visual voltage indication
- Built-in bright flashlight with On/Off button
- Rugged double-moulded housing
- Tip fits into outlets or against wire insulation testing

PART NO. DESCRIPTION

C35-2192 EXTECH DV25 VOLTAGE DETECTOR WITH FLASHLIGHT

KEWTECH KEWSTICK DUO POCKET VOLTAGE DETECTOR

Unique dual sensitive non-contact voltage detector or volt stick commonly used in conjunction with the C72-7423 Kewtech KTIPI Proving Unit - just press and hold the desensitising button and you can differentiate between live and earthed cables approximately 10mm apart. Dual sensitivity Heartbeat - green LED indicates that the unit is on and working correctly, red LED indicates presence of voltage.

This volt pen also has an audible tone to indicate the presence of voltage.

Requires 2x AAA batteries (not supplied)

- Clearly detects 90 - 600 volts AC without metal contact
- Two colour LEDs - Green for correct working and Red for Voltage detection
- Two tone buzzer, one for correct working and one for voltage detection
- Cat IV rated

PART NO. DESCRIPTION

C72-7424 KEWTECH KEWSTICK DUO POCKET VOLTAGE DETECTOR

SAGAB VOLT STICK LV50

Volt Stick is an instant tester for safely checking the presence of an AC voltage, without making any disconnections in cables, wall sockets, fuses, circuit breakers, junction boxes, etc.

- EEx approved voltage indicator for use in explosive environments
- Voltage indicator with safety handguard to avoid unintentional contact with live conductors
- Voltage range 50 ~ 1000v AC
- Intrinsically safe
- Sensitivity: Indicator will illuminate at 4mm distance of a 2.5mm conductor carrying 50v
- Power Requirements: 2 x Standard AAA alkaline batteries (supplied)
- Operating Temperature: -20 ~ +50°C
- Overvoltage: CAT III 1000v AC
- Dimensions: 145(L) x 18(Ø) mm
- Weight: 35g (including batteries)

PART NO. DESCRIPTION

C70-7367 SAGAB VOLT STICK LV50

SAGAB VOLT STICK SOUND VOLTAGE INDICATOR

The Volt Stick Sound features a detection buzzer for even greater clarification. Also ideal for 'detection round corners', in bright daylight and in awkward out of sight areas. Volt Stick Sound is an instrument for safely checking the presence of an AC voltage in cables, wall sockets, fuses, junction boxes, etc.

- Voltage range: 230-1000V AC
- Sensitivity: Indicator will illuminate at 4mm distance of conductor carrying 230V
- Response Time: Immediate
- Batteries: 2 x 1,5V AAA (supplied)
- Relative Humidity: 80% @ 30°C, 50% @ 40°C
- Operating Temperature: -20 ~ +50°C
- Overvoltage: CAT III 1000V AC
- Dimensions / Weight: 145(L) x 18(Ø) mm / 35g (including batteries)

C72-1970 SAGAB VOLT STICK SOUND VOLTAGE INDICATOR

MARTINDALE TEK100YE NON CONTACT VOLTAGE DETECTOR

Suitable for detecting 180V to 600V AC rms without requiring physical contact with the conductor. The presence of any voltage between 180V and 600V AC will generate an audible tone, together with a red visual indication.

Voltage range: 180V to 600V AC rms.

Frequency range: 45Hz to 1kHz.

PART NO. DESCRIPTION

C70-7360 MARTINDALE TEK100YE NON CONTACT VOLTAGE DETECTOR

MARTINDALE TEK101 NON-CONTACT VOLTAGE DETECTOR

The Martindale TEK101 is a simple to use non-contact voltage indicator with both audible and visual warnings and an extended probe tip for access to confined spaces. Optimised for identifying energised conductors at voltages within the range 180V to 600V AC, it incorporates a unique built-in 50Hz proving unit which tests the sensor operation, battery and LED.

Voltage range: 180V to 600V AC rms.

Frequency range: 45Hz to 1kHz.

C70-2022 MARTINDALE TEK101 NON-CONTACT VOLTAGE DETECTOR

MEGGER VF5 VOLTAGE DETECTOR

The Megger VF5 Voltage Detector is intended to be used to check for the presence of AC voltage, indicated by a bright red LED situated within the white nylon tip, an audible sounder, plus vibration alert.

Features:

- AC non-contact voltage detector
- 12V – 1000V voltage range
- Visual, audible and vibration warning of low and medium voltages
- Durable rubber over-moulded body
- IP67 rated
- Screw-on battery cover
- Built-in bright-white LED torch
- CAT IV 1000V

MEGGER VF6 EX VOLTAGE DETECTOR

The Megger VF6 EX Voltage Detector is EX rated for use on gas platforms and other petrochemical environments and is intended to be used to check for the presence of AC voltage, indicated by a bright red LED situated within the white nylon tip, an audible sounder plus vibration alert.

Features:

- Hazardous area rated
- AC non-contact voltage detector
- 12 V – 1000 V voltage range
- Visual, audible and vibration warning of low and medium voltages
- Screw-on battery cover
- Built-in bright-white LED torch
- CAT IV 1000V
- IP67 rated

PART NO.	DESCRIPTION
C72-2517	MEGGER VF6 EX VOLTAGE DETECTOR

NC4 AUDIBLE AND VISUAL VOLTAGE TESTER

The NC4 audible and visual voltage tester has two sensitivity ranges for accurately detecting the presence of AC voltages. The first will detect voltages between 50V and 1000V and the second will indicate voltages between 12V and 1000V. The extended probe tip gives improved access and easier identification of live wiring.

Features:

- 2 Indication Ranges (12V and 1000V). Default: 50-1000V AC
- High sensitivity: 12-1000V AC 40-400Hz
- Indication Audible and LED
- Conforms to BS EN 61010-1
- Supply 2x AAA batteries (included)
- Weight 55g (incl. battery)

Dimensions: 155mm length, approx. 25mm diameter

KEWTECH KT1700 SINGLE POLE VOLTAGE DETECTOR

The Kewtech KT1700 Single Pole Voltage Detector is a voltage pen that can detect voltages between 50 and 600V AC and will issue an audible and visual warning (flashing red front section) when a voltage greater than 50V AC is detected. A voltage pen delivering the first level of protection against electric shocks.

- Voltage range: 50 to 600V AC
- Audible and visual warnings indicate voltages greater than 50V AC
- Easy to use even when wearing PPE
- Flashing blue LED and a single beep indicate correct functionality
- IP54
- Meets the international safety standard: BSEN61010-1:2010
- The probe tip conforms to HSE GS38 recommendations
- Safely and reliably detect live phases

PART NO.	DESCRIPTION
C70-2010	KEWTECH KT1700 SINGLE POLE VOLTAGE DETECTOR

MARTINDALE VT7 SINGLE POLE VOLTAGE INDICATOR

A single pole contact voltage indicator which detects AC voltages of 50V-600V with audible and bright LED indication.

This ergonomically designed voltage tester has a self-test function and is IP54 rated, for indoor and outdoor use. The tester is of durable construction making it suitable for both industrial and domestic applications.

Uniquely, the VT7 can be used when wearing protective gloves and gauntlets ensuring safe working practices can be adhered to at all times.

The probe is GS38 compliant and is ideal for detecting live panel casings.

The external tip enables easy access in confined spaces.

MARTINDALE TEK200 NON CONTACT VOLTAGE & MAGNETIC FIELD DETECTOR

The TEK200 can detect the presence of voltages from 100V to 600VAC or magnetic fields on solenoids or relays giving a visual & audible indication.

Specifications:

- Voltage range 100 to 600V AC
- Frequency range 45Hz-1kHz
- Sensitivity registers at 3mm for 110V 50Hz, 23mm for 240V 50Hz (depending on cable type)
- Magnetic sensitivity 10mT
- Frequency range 0 to 30kHz
- Features Self test proving function
- Voltage Indication LED and audible for N/S pole magnetic fields and voltages
- Temperature -5°C to 40°C
- Supply 9V alkaline battery, MN1604 or equivalent (included)
- Weight 120g approx. (incl battery)
- Dimensions 205 x 36 x 25mm

For more information please visit our website millsltd.com

PART NO.	DESCRIPTION
S19-001	MARTINDALE TEK200 NON CONTACT VOLTAGE & MAGNETIC FIELD DETECTOR

A) MEGGER TPT420 CATIV 100V 2 POLE TESTER

The TPT420 provides both AC and DC voltage measurement - from 12 to 1000 V AC and up to 1500 V DC. In addition, a continuity function within the range 0 to 500 kΩ, is included and for added safety, continuity and voltage measurements are also accompanied by an acoustic sounder.

- Voltage range: LED: ±12, 24, 50, 120, 230, 400, 690, 1000 V / LCD: 12 - 1000 V AC/1500 V DC
- Voltage Warning Indication LED: <50 VAC, <120 VDC
- Frequency range: 40 – 400Hz
- Single pole test: 100 – 1000 V AC (50/60 Hz)
- Phase Rotation: 120 - 400 V Phase to phase, AC 50/60 Hz
- Overvoltage category: CAT IV 1000V
- Ingress Protection: IP64
- In compliance with: EN 61010, EN 61243-3:2014, DIN VDE 0682-401
- Operating Temperature: -5 to 40°C (Storage:-20 to 70°C)
- Power supply: 2 x 1.5V batteries. Type AAA LR03

Dimensions: 255 x 67 x 30mm. Weight: 207g

For more information please visit our website millsld.com

B) MARTINDALE VI-13800 VOLTAGE INDICATOR

The VI-13800 is an essential tool for proving electrical circuits are dead before carrying out maintenance and installation work in accordance with safe isolation procedures. The VI-13800 ensures safety through simplicity, with no ranges, switches or batteries, reducing the risk of an incorrect reading.

The VI-13800 provides instant visual AC and DC voltage indication in four stages from 50V to 400V. The bright long life LED indicators give clear and immediate display of the voltage level range.

Specifications:

- Voltage range 50-600V AC/DC
- LED Indication ± 50, 100, 200, 400V
- AC/DC voltage detection automatic
- Frequency range DC, 1-400Hz

Includes a Martindale proving unit, combination carry case and locking off devices.

C) MARTINDALE ELITE DIGITAL FUSE FINDER FD550

The Elite 2 part Fuse Finder kit brings microprocessor controlled multi-level sensitivity to fuse and breaker identification.

2 Modes available:

- (A) Automatic mode: which has a memory and auto adjusting for sensitivity for foolproof identification.
 (B) Manual mode: which allows very rapid fuse finding using the bargraph.

Weight: 150g.

Dimensions: 202 x 32 x 22mm.

D) E) DRUMMOND TEST LAMPS

The Drummond MTL10 (C70-2074) and The Drummond MTL20 (C70-7361) Test Lamps gives safe indication of voltage between 50V and 500V AC/DC. The lamp housing and probe both have a finger shield and insulated probe tip with only 4mm of exposed metal. The bulb of the MTL 10 offers four distinct bands of illumination that provide indications of voltages above 50, 100, 200 and 400 volts even in bright sunlight. This John Drummond test lamp allows for the accurate identification of dangerous voltages and enables the user to distinguish between 110V, 230V and phase to phase voltages in a 3 phase system.

The Drummond MTL 20 (C70-7361) benefits from two test buttons that when pressed simultaneously will enable the test lamp to draw a high current. This allows the user to differentiate between phantom voltages and hazardous persistent voltages.

The robust design test lamp meets the recommendations of the Health and Safety Executive (GS38) and complies with BS EN 61243-3 and BS EN 61010, CAT III 1000V and CAT IV 600V.

MEGGER DCM330 FORK MULTIMETER

The Megger DCM330 Fork Multimeter is a convenient, compact instrument designed to measure ac current up to 200 A, and perform the basic functions of a basic multimeter. With AC and DC voltage measurements up to 1000 V and resistance measurements up to 20 M Ω , a non-contact voltage detection facility and a continuity buzzer with diode check, the Megger DCM330 is a truly versatile instrument. All of these features combined into a single compact instrument eliminate the need for separate multimeter and clampmeter.

- 200 A AC Open Jaw current measurement
- 0.1 V to 1000 V auto-ranging AC and DC voltage measurement
- 0.1 Ω to 20.00 M Ω resistance range
- Continuity buzzer and diode check
- Non-contact detection of AC voltage
- CAT III 1000V and CAT IV 600

MARTINDALE PD440S 440V AC PROVING UNIT

The Martindale PD440S is a 440V AC proving device, designed to enable voltage indicators to be fully checked, in compliance with Health & Safety recommendations. Using a voltage indicator without first proving it is working correctly could prove fatal. The PD440S is compatible with the Martindale VII3800 & Martindale VII3700. It can also be used to check Drummond and other filament test lamps as well as standard multimeters and other manufacturers two pole voltage indicators.

MEGGER MET1000 ELECTRICAL TESTER

The Megger MET1000 is a multifunctional voltage and current tester providing electricians and electrical engineers with a versatile and robust hand-held all in one meter, with detachable test leads. Featuring both LED and LCD displays, it gives the user a 200 A AC and 1000 V AC/DC tester designed for everyday use.

- CAT IV 600 V / CAT III 1000 V rated.
- Continuity to 50 K Ohms
- 9999 count digital display
- Input peak current < 3.5 m A @ 1000 V
- 16 mm wide jaw size
- ELV Indication
- Carrying holster with belt loop
- \varnothing 2 mm / \varnothing 4 mm tips interchangeable
- LED Torch

KEWTECH KTP1 PROVING UNIT

Portable proving unit or voltage source for use on / off site for instantly testing non-contact voltage testers before and after use.

Commonly used in conjunction with the C72-7424 Kewtech Kewstick Duo Pocket Voltage Detector prior to opening green street cabinets.

Simple to use, just press the button and it tests.

- Belt clip for hands-free use
- Visual LED indication of function
- Robust and drop-proof from 1 metre
- Comes complete with a 9V battery
- As used by the large telecom utilities

MARTINDALE ET4 MULTIFUNCTIONAL TESTER

The ET4 is a very compact electrical tester that measures AC/DC voltage, resistance and AC/DC current. Continuity with a buzzer is also included.

It can also measure frequency and continuity and will take simultaneous measurement of current/ voltage and frequency / voltage by employing the open jaw clamp and test probes simultaneously.

- AC/DC voltage up to 600V
- AC/DC current up to 200A
- Continuity (with buzzer < 30 Ω)
- Frequency measurement 30Hz - 400Hz
- Carry case with belt loop
- Weight 200g
- Dimensions 202 x 51 x 44 mm
- Includes TL17 test leads, 9V battery, case and manual

MEGGER MPU690 TWO POLE TESTER PROVING UNIT

The Megger MPU690 proving unit provides an alternative portable battery operated voltage source that can verify the correct functioning of a voltage tester.

The device safely generates a range of voltages from 50 to 690 volts in five steps. At switch on, the unit initially generates 690 volts then after a short period, slowly ramps down through each voltage step until the device switches off.

The rugged case of the MPU690 features a magnetic base for convenient use.

SMART METER INSTALLATION KITS

A) DRUMMOND SMKIT10 (C72-7286)

B) SMKIT20 (C72-7287)

The complete solution to enable safe working practices during the installation of Smart Meters. The SMKITs contain all the test tools needed to ensure safe isolation procedures can be implemented during the installation process.

The comprehensive kits include, a Buzz-It check plug for checking the wiring on 13A sockets a non-contact voltage indicator with probe tip for identifying phase and neutral lines and a single pole contact voltage tester suitable for use when wearing protective gloves and gauntlets. The SMKIT 10 includes the Drummond test lamp MTL10 with proving unit, whereas the SMKIT 20 includes the Drummond test lamp MTL20 with proving unit.

- 1 x BZ101 – Buzz-It Check Plug with Sounder for UK 13A Sockets (SMKIT10 only)
- 1 x TEK101 – Non-contact voltage indicator with built in proving device
- 1 x VT7 – Single Pole Contact Voltage Tester suitable for use when wearing PPE
- 1 x MTL10 or MTL20 – Drummond AC/DC Dual Impedance Test Lamp CAT IV 600V
- 1 x PD440 – Proving Device
- 1 x TC70 – Combination soft carry case

MARTINDALE MTL10PD AND MTL20PD TEST LAMP WITH PROVING DEVICE BUNDLE

The Martindale Test Lamp and Proving Device Bundle are ideal solutions for installers who need to check for voltage in a circuit before starting work. It features a test lamp, proving unit and useful carry case.

The Martindale PD440 Proving Unit produces voltage up to 440V, thus allowing the user to verify the function of the test lamp before checking for voltage presence.

The kits comprise the Martindale PD440 Proving Unit (C70-7364) and a choice of either the Drummond MTL10 (C70-2074) or MTL20 CC70-7361) single-pole test lamp

The Drummond MTL 20 (C70-7361) benefits from two test buttons that when pressed simultaneously will enable the test lamp to draw a high current. This allows the user to differentiate between phantom voltages and hazardous persistent voltages.

Both instruments and the test prods are supplied in a handy carry case.

PART NO. DESCRIPTION

C70-3414	A) MTL10 TEST LAMP WITH PROVING DEVICE BUNDLE
C70-2097	B) MTL20 TEST LAMP WITH PROVING DEVICE BUNDLE

A) MARTINDALE CP501 CHECK PLUG

Martindale CP501 Check Plug from Martindale is a fast and easy way to ensure that 13A sockets are wired correctly, indicated by all three high brightness, long life LEDs illuminating.

Wiring errors are indicated by one or more LEDs failing to light, with the pattern of lit LEDs indicating the type of fault. This failsafe socket tester system means that any neon not lit indicates a problem.

**B) MARTINDALE BZ101 BUZZ-IT AUDIBLE CHECK PLUG**

Martindale BZ101 Buzz-IT is similar to the CP501 (C50-1224) but with an audible feature to ensure 13A sockets are wired correctly in the same way as the classic check plug.

It can also be used as a basic fuse finder - when the correct fuse is pulled the buzzer stops! Shows 28 faults.

**C) MARTINDALE BZ701 AUDIBLE SOCKET TESTER WITH MAINS POLARITY CHECK**

The NEW BZ701 Socket and Polarity Tester is a further development in our Socket Tester range. It incorporates all standard BZ101 (C70-7353) indications for both correct wirings as well as 28 different fault conditions.

The BZ701 can also check the polarity of the incoming supply via the Blue Polarity Touchpad on the front of the unit. Correct incoming supply polarity is indicated by the flashing green LED's accompanied by the continuous buzzer.

Incorrect supply polarity will be indicated by the LED's turning RED and a pulse tone on the buzzer. This will continue after the removal of the finger from the touchpad and confirming a need for further investigation.

**D) MARTINDALE EZ165 SOCKET & NON-TRIP EARTH LOOP TESTER**

A further enhanced check plug to the CP501 (C50-1224) and BZ101 (C70-7353), in addition to detecting 28 socket wiring fault conditions and checking mains voltage levels, the EZ165 verifies the earth wiring by carrying out a non-trip earth loop test and indicating its value in 6 discrete ranges from less than 1.7 Ω to 500 Ω .

Socket polarity and earth wiring faults are identified by a combination of red LEDs. The 3 LEDs correspond to neutral, earth and live connections to aid fast identification of the source of common faults. A look up chart on the tester provides further fault diagnosis.

**E) BICOTEST TRUPOL TRUE POLARITY TESTER FOR PME SYSTEMS**

The Bicotest Tru-Pol is primarily designed for electricity distribution companies to indicate cross polarities of the incoming customer supply. Indication is given both visually and audibly with a strong warbling tone for any fault, and a continuous tone for good wiring.

- Visual and Audible Feedback
- Indication of up to 19 different wiring conditions
- Logical & simple 'Green for Go' LED Indication

METREL MD9240 EARTH LEAKAGE CLAMP METER WITH POWER FUNCTIONS

The Metrel MD 9240 enables TRMS AC current measurement up to 1000 A, single-phase power analysis, AC and DC voltage measurement, temperature measurement and more.

- TRMS: accurate measurements on sinusoidal and non-sinusoidal signals.
- Jaw size: 45 mm.
- High current: up to 1000 A AC.
- Power: measures various power signals (W, VA, PF or THD).
- Measures temperature up to 300 °C.
- PC Link: unit results can be linked onto a computer via the optional software.
- Peak hold: peak hold function for monitoring starting motors.

The CM79 is a new pocket-sized high performance TRMS

AC/DC Clamp meter measuring AC and DC current up to 600A, AC/DC voltage and resistance with continuity test. The compact rugged design enables accurate and reliable DC current measurements down to 10mA resolution in applications including PV installations, battery monitoring and electric vehicles. The TRMS capability ensures accurate and

reliable AC current and voltage measurement for distorted waveforms caused by today's power electronics and non-linear loads found in modern lighting and power supplies. Specifications:

- Current AC 60.00A/600.0A
- Current DC 60.00A/600.0A
- Voltage AC 600.0V
- Voltage DC 600.0V
- Ohms 999.0Ω
- Continuity buzzer ≤ 30Ω

MEGGER DCM320 DIGITAL CLAMP METER

The DCM320 with 27mm clamp for use during the installation, maintenance and checking of electrical systems and equipment.

It will measure AC current (50 - 60 Hz) up to 400 A, and has the benefit of measurement ranges for AC and DC voltages up to 600 V, and resistance up to 20 M Ω , via the terminals and supplied test leads. It also has a continuity buzzer that operates up to 20 Ω .

It is safety rated to IEC 61010 CAT III 600 V offering high levels of protection to the operator.

Supplied with Carrying Case

MEGGER DPM1000 POWER CLAMP METER

The new Megger DPM1000 Power Clamp meter is a versatile instrument that combines the functionality of power meter, harmonics meter and data logger in one easy to use package.

- AC/DC Voltage to 1000 V
- AC/DC Current to 1000 A
- True RMS
- Resistance 100 k Ω
- Phase rotation indication
- Inrush peak current
- Frequency measurement
- Capacitance measurement
- Power Factor measurement
- Watt measurement to 1 MW
- Harmonic measurement and distortion
- Temperature to 1000 °C
- CAT IV 600 V Rating
- Supplied complete with test leads and Thermocouple Probe in full sized Carry case

MEGGER DCM340 DIGITAL CLAMP METER

The DCM340 is a highly versatile instrument and ideal for use in the installation, maintenance, monitoring or checking of AC or DC electrical systems and equipment.

Current measurement combined with the comprehensive and accurate multimeter functions of the DCM340 eliminate the need to carry around both a clampmeter and multimeter - this instrument does it all.

- DC and AC current and voltage
- 600 A and 600 V
- Resistance and continuity
- 3½ digit, 4000 count display with backlight
- High resolution digital bargraph
- Peak, min/max and data-hold functions
- Supplied complete with test leads, batteries and carry case

MEGGER DCM1500S CLAMP METER

The Megger DCM1500S Solar Clamp Meter measuring up to 2000 V DC and 1500 V AC (using the PVHV Leads), as well as 1500A AC or DC, the DCM1500S is ideal for use in the installation, maintenance, monitoring and testing of electrical systems and equipment, including Solar/Photovoltaic installations where there is a need to measure current, volts, resistance and frequency. It is therefore intended for use while installing, maintaining, fault-finding or monitoring those systems.

DCM1500S is safety rated to IEC 61010-1 and IEC/EN61010-2-033 CAT IV 600 V, and CAT III 1000 V.

Supplied complete with 4mm test leads and croc. clips, K-Type Thermocouple probe, batteries and hard carry case

KEWTECH KT66DL ADVANCED MULTIFUNCTION TESTER

Kewtech KT66DL 12-in-1 Multifunction Tester provides accuracy and performance engineered with a pioneering, sophisticated loop testing system, including 3 & 2 wire low current test options complete with a comprehensive RCD testing facility and EV charging point test capacity. Supplied with test lead with remote test button, batteries, instruction manual, calibration certificate, mains lead, test lead pouch and soft carry case.

For more information please visit our website millsld.com

Tests include:

- Continuity
- Insulation
- Hi current loop
- Lo current loop
- PSC
- PFC
- RCD
- Volts
- Earth resistance
- SPD
- Phase rotation
- PAT

KEWTECH KT6SDL MULTIFUNCTIONAL TESTER

Proven multifunction tester combining the latest anti-trip technology, phase rotation, earth resistance & advanced memory, with easy to use functionality. Specifically designed for the UK market.

- 0.001 Ohm high current loop test
- PAT testing capability with download
- Best loop performance accuracy
- Selectable Max Zs tables for MCBs and Fuses
- Conducts 55V loop test
- UK specific RCD test
- Advanced memory feature
- Supplied complete with test leads, batteries and carry case

MEGGER MULTIFUNCTION TESTER MFT1741

The MFT1741 offers a wide range of test functions, designed for all electrical installation testing and verification of low voltage building wiring and distribution testing scenarios. The MFT1741 is IEC 61010 CAT IV 300 V rated for safe connection anywhere within the LV network on single and three-phase systems.

- Enhanced non-trip loop impedance measurement technology
- "Confidence meter" measurement analysis (patent pending)
- Full single and 3 phase compliant installation testing
- 10 mA to 1 A single and 3 phase RCD testing
- Simple colour-coded test selection
- Ambidextrous operation
- Supplied with lead set with prods and clips, mains plug test lead (BS1363), AC battery charger and large soft pouch with extra storage

C00-0100 MEGGER MULTIFUNCTION TESTER MFT1741

MEGGER MFT1741+BS MULTIFUNCTION TESTER

The MFT1741+ multifunction tester provides all the tests required to complete the necessary electrical certification for industrial, commercial and domestic fixed wiring installations, and includes:

- TRMS System voltage and frequency measurement
 - Insulation test at 100 V, 250 V, 500 V and 1000 V
 - Continuity resistance at 200 mA or 15 mA
 - Automatic start - no need to press TEST
 - Resistance range up to 100 kΩ
 - Earth loop impedance testing 2 and 3 wire
 - RCD testing
 - Prevents any influence the RCD may present to the total loop impedance value.
 - New electric vehicle charge point testing
- Supplied with lead set with prods and clips, mains plug test lead (BS1363), AC battery charger and large soft pouch with extra storage.

MARTINDALE ET4000 RECHARGEABLE MULTIFUNCTION TESTER

The ET4000 tester carries out all the tests needed to verify the safety of electrical installations in domestic, commercial and industrial wiring installations in accordance with latest BS7671 18th Edition Wiring Regulations published July 2018.

- Insulation test 50VDC, 100VDC, 250VDC, 500VDC, 1000VDC
- Continuity test Short circuit current >200mA
- RCD test 10mA, 30mA, 100mA, 300mA, 500mA, 1000mA., Type AC, A, F, S, 0.5, 1, 5 x 1 auto and ramp test
- Loop Test Dual display (Loop Resistance of PFC), High Current L-L L-N, Non-trip L-PE
- Voltage TRMS 0-550V, Frequency 9.99Hz/499.9Hz, Phase rotation
- Dimensions 230 x 103 x 115mm
- Weight 1.3kg approx

SEAWARD SOLAR SURVEY 200R IRRADIANCE METER

This rugged handheld unit not only measures irradiance, but also has a built-in inclinometer to measure roof pitch, compass to measure roof orientation and thermometer to measure ambient air and module temperature.

The 200R now features new Solarlink™ connectivity which allows it to wirelessly give the PV150/PV200 real-time irradiance, ambient temperature and PV module temperature measurement results simultaneously to electrical tests being conducted, as required by the IEC 62446 international standard. Results can be downloaded from the PV150/PV200 into certification software.

The Solar Survey 200R includes a data logging facility with USB interface for data download to a PC. This allows for irradiance and temperature to be recorded at user-defined intervals over a number of hours or days.

This high specification irradiance meter simply and quickly measures the sun's irradiance, displaying the information in either W/m² or BTU/hr-ft², making it ideal for both solar photovoltaic and thermal applications.

TPI 510 SOLAR IRRADIANCE METER

The TPI Solar Meter is easy to use and designed to measure solar power in W/m² or BTU (ft²h).

Application and Features:

- Use to find the optimal angle of inclination for installing solar panels
- Measure light intensity through windows
- Determine the effectiveness of solar film / window tint
- Measure solar radiation (irradiance)
- Displays results in W/m² or BTU
- 0 to 1999 W/m² (0 to 634 BTU) range
- Min / Max and Data hold functions
- Dimensions & Weight: 132 x 60 x 38 mm, approx. 150g

MEGGER PS1410 PHASE SEQUENCE INDICATOR

Electrical work on commercial and industrial installations often requires working on motorised machinery with three phase supplies. Correct sequence of the phases is important with certain motors and pumps as damage to brakes and valves will occur in minutes with incorrect phasing.

The Megger PS1410 phase rotation indicator provides rapid indication of correct phase sequence utilising a three bi-coloured LED display and a specific audible tone.

Features:

- LED clockwise and counter clockwise phase rotation indication
- Audible indication of direction
- Phase condition LEDs
- Fused test leads
- Croc clips and prods provided
- Dual phase colour identification

KEWTECH KEW301 DUAL CHANNEL THERMOMETER

Designed for use with industry-standard type K thermocouples (x2 included), the KEW301 can measure temperature from a single input (choice of T1 or T2) or from both simultaneously (T1-T2) for checking differential temperature levels.

The thermometer measures temperature levels from -200 to 1370°C (-328 to 2498°F) with a resolution of 0.1°C/°F. The thermometer includes a dual display backlit LCD screen which shows either single or dual testing results and has a tripod connector for hands-free use. Includes MAX/MIN and AVG modes + a relative function

KEWTECH KT300 DIGITAL INSULATION / CONTINUITY TESTER

Kewtech KT300 Digital Insulation / Continuity Tester, using the latest in technology, providing slick 18th edition testing. Compact, accurate, easy to use with a 'hands free' facility.

- Insulation test at 50 V, 100 V 250 V, 500 V & 1000 V
- Continuity test with audible tone
- Test lead null facility
- Buzzer mode
- Hands free function
- Breakdown voltage - Checks SPDs
- Voltage present LED
- Magnetic hanger for clipping on to metal distribution boards
- Auto power off
- Dimensions: 180 mm x 85 mm x 50 mm
- Weight: Approx. 450 g

TPI 725L COMBUSTIBLE GAS LEAK DETECTOR

40 PPM methane sensitivity, detects combustible gases including: Methane, Butane, Propane, Gasoline, Diesel and Kerosene. Tick rate can be nullified to eliminate background gas concentration and pinpoint the leak source.

- 40ppm methane sensitivity and bearing defects
- Trace natural gas lines and fittings for leaks frame to failure
- Check gas equipment for leaks
- Test propane tanks, fittings, lines, and heaters for leaks
- Check propane tanks, fitting lines and heaters for leaks
- Test confined spaces for gas build-up

MEGGER PVK320 PHOTOVOLTAIC TEST KIT

When installing, commissioning and testing a photovoltaic installation additional instrumentation is required to accompany the usual electrician's test equipment.

The Megger PVK320 photovoltaic kit offers this additional instrumentation in the form of a PVM210 irradiance meter, a CATIV 10 A dc AVO410 multimeter and a kit of specialist solar test leads.

Comprises:

- PVM210 irradiance meter
- AVO410 CATIV TRMS multimeter
- C4 solar connectors to 4 mm standard plug test leads
- MC3 to MC4 adaptor test leads
- PV kit storage pouch

MEGGER PVM210 SOLAR IRRADIANCE METER

The Megger PVM210 provides the solar / photovoltaic engineer a compact, pocket size instrument that is easy to use. Range: 1999 W/m^2 / 634 BTU / (ft²h). With the easy to read display and measurement hold feature the meter gives fast, accurate readings of solar power for initially choosing optimum position for the photovoltaic panel.

For more information please visit our website millsstd.com

Features:

- Optimal incident angle and positioning of solar panels
- Measurement of solar power for panel short circuit calculation
- 3 1/2 digit LCD display with 1999 W/m^2 range
- Standard camera mount fixing for accurate placement
- Dimensions: 134 mm (H) x 48 mm (W) x 27 mm (D)
- Weight: 90 g

SEAWARD SOLAR UTILITY PRO COMPLETE KIT

The new Solar Utility Pro from Seaward takes PV testing to the next level. With the introduction of more efficient 1500V modules and inverters for an easy to use and robust tester with 1500V capabilities.

Its market leading 40A current capability enables the Solar Utility Pro to test parallel wired strings up to a maximum of 1500V / 40A, eliminating the time consuming task of separating strings to keep within lower limits of other instruments.

Features:

- Test multiple strings in parallel up to 1500V 40A.
- Test at a string level or in the combiner box.
- Record up to 999 full sets of string data.
- Test open circuit voltage (Voc), short circuit current (Isc), irradiance (W/m²), ambient temperature & more.
- Free product and O&M training with every purchase.

METREL MI 3108PS EUROTSTPV PRO KIT

The Metrel MI 3108 EurotestPV is a combined photovoltaic tester and electrical installations safety tester. It enables complete testing of electrical installations according to EN 61557 standards and in addition performs all necessary tests required on single-phase photovoltaic (PV) installations.

Contents:

- Instrument MI 3108 EurotestPV
- EurotestPV Remote unit + cable adaptor
- Tip commander
- Soft carrying bag
- Test lead, 3 x 1.5 m
- Test probe, 4 pcs (red, green, blue, brown)
- Crocodile clip, 4 pcs (red, green, blue, brown)
- PV Safety Probe
- PV MC3/4 male/female adaptors
- AC/DC current clamp
- PV reference cell + cable adaptor
- Temperature probe + cable adaptor
- Power supply adaptor, 2 pcs
- Mains plug cable, 1.5 m
- UK mains cable for charging adaptor, 2 pcs
- NiMH batteries, type AA, 12 pcs
- USB cable
- RS232 - PS/2 cable
- PC SW EuroLink PRO
- Set of carrying straps, 2 pcs
- Short instruction manuals

The Seaward PV200 Solar PV Tester and I-V Curve Tracer (389A910) is a highly efficient, all-in-one instrument suitable for testing and diagnosing problems within a solar photovoltaic electrical installation.

Comprising:

- Seaward PV200 I-V curve tracer
- Seaward Solar Survey 200R Irradiance Meter
- Seaward Solar Survey 200R Mounting Bracket
- Seaward SolarCert Solar PV Reporting Software
- Seaward AC/DC Current Clamp

Accessories - 2 x MC4 test lead adaptors, 2 x combiner box test probes and detachable alligator clips (MC4), 2 x test leads with detachable alligator clips (4mm), USB download cable, rugged carry bag, quick start guide, calibration certificates and a 2 year warranty.

METREL MI 3108ST EUROTSTPV STANDARD KIT

The Metrel MI 3108 EurotestPV is a combined photovoltaic tester and electrical installations safety tester. It enables complete testing of electrical installations according to EN 61557 standards and in addition performs all necessary tests required on single-phase photovoltaic (PV) installations.

Contents:

- Instrument MI 3108 EurotestPV
- Soft carrying bag
- Tip commander
- Test lead, 3 x 1.5 m
- Test probe, 3 pcs (blue, black, green)
- Crocodile clip, 3 pcs (blue, black, green)
- PV Safety Probe
- PV MC3/4 male/female adaptors
- AC/DC current clamp
- PV reference cell + cable adaptor
- Temperature probe + cable adaptor
- Power supply adaptor + 6 NiMH batteries, type AA
- USB and RS232 - PS/2 cable
- PC SW EuroLink PRO
- Set of carrying straps
- Short instruction manual
- Instruction manual and handbook on CD
- Calibration certificate

The Metrel MI 3109 EurotestPV Lite is a photovoltaic (PV) tester that performs all necessary tests required on photovoltaic installations. This includes all of the tests as required by EN 62446, but also includes I - U characteristic measurements, calculation of STC values and power measurements on Inverter's DC and AC sides (single-phase only).

Contents:

- Instrument MI 3109 EurotestPV Lite
- EurotestPV Remote
- PV Safety Probe
- Pyranometer
- Temperature probe
- Soft carrying bag, 2 pcs
- Universal PV test lead, 3 x 1.5 m
- PV Continuity test lead, 2 x 1.5 m
- Test probe, 3 pcs (red, blue, green)
- Crocodile clip, 3 pcs (red, blue, green)
- PV MC3/4 male/female adaptors

MEGGER DLRO10 10A LOW RESISTANCE OHMMETER + DH4-C LEAD SET

The DLRO 10 is a fully automatic instrument, selecting the most suitable test current up to 10 A DC to measure resistance from 0.1 $\mu\Omega$ to 2000 Ω , on one of seven ranges.

Features:

- Auto current reversal cancels standing emfs
- Protected to 600 V
- Automatically detects continuity in potential and current connections
- Multiple operating modes including fully automatic
- Supplied with DH4-C Lead Set

Megger part number 1006-598

MEGGER DLRO10HDX DIGITAL LOW RESISTANCE OHMMETER + DH4-C LEAD SET

Augmenting Megger's DLRO10 and 10X range the DLRO10HDX combines ultimate simplicity of operation with a rugged IP65 case designed for stable ground and bench operation.

Features:

- Onboard memory storage for test results up to 200 records
- Download to PowerDB
- Interchangeable test lead terminations
- High or low output power selection for condition diagnosis
- Operates from rechargeable battery or AC mains supply
- Protected to 600 V without blowing a fuse, test lead live voltage warning light

KC30 / KC60 MEGGER WIND TURBINE LIGHTNING PROTECTION TEST LEAD SETS

The KC-series of test leads provides a complete and convenient solution to the problem of finding reliable test leads that are long enough for testing the continuity of lightning protection conductors in wind turbines.

KC-series wind turbine test leads are available in 330 ft, 200 ft and 100 ft (100 m, 60 m and 30 m) versions that are equally suitable for use on site or in the manufacturing plant. All lead set versions are 10 A rated.

MEGGER MOM2 MICRO OHMMETER

The MOM2 handheld 200 A micro-ohmmeter has been designed to measure the resistance of circuit breaker contacts, busbar joints, and other high current links.

Features:

- Up to 220 A
- Battery powered
- Weighs only 1 kg
- Safe testing with DualGround™
- Auto range: 1 $\mu\Omega$ to 1000 m Ω
- Bluetooth® PC communication
- Complies with IEEE and IEC standards

MEGGER DET2/3 HIGH RESOLUTION EARTH TESTER

The Megger® DET2/3 automatic earth (ground) test instrument is robust, compact and designed to measure earth Electrode Resistance and Soil Resistivity. It provides a full range of test methods and excels at the four terminal method of measurement, which eliminates the resistance of the current circuit from the measurement.

Features:

- High resolution of 1 m Ω , ideal for large earth (ground) systems
- Versatile test modes
- High accuracy for earth (ground) electrode grid and soil resistivity tests
- Rechargeable battery power that can last all day with a fast re-charge (up to 10 hours)
- Robust instrument with IP65 protection

MEGGER DET24C CLAMP-ON EARTH TESTER WITH MEMORY / DOWNLOAD

The DET24C digital earth/ground clamp represents a new generation of clamp-on resistance testers. These instruments induce a test current into earth systems and measure ground resistance in multi-ground installations without needing to disconnect the ground.

Features:

- Elliptical clamp shape improves access to earth cables and straps up to 50 mm
- Low maintenance flat jaw interface
- Measures ground resistance from 0.05 to 1500 Ω
- Measures true RMS ground leakage current from 0.5 mA rms to 35 A rms
- CAT IV 600 V safety rating
- Backlit LCD display

MEGGER MTR105 HAND HELD ROTATING MACHINE TESTER

The MTR105 is a dedicated Static Motor Tester with Megger's tried and trusted suite of insulation resistance tests (IR), plus all the great traditional features and reliability of Megger's testers.

Features:

- Guard terminal to eliminate any surface leakage current.
- Detachable test leads with interchangeable clips and probes for different applications.
- Stores test results for up to 256 motors, which can be downloaded to a USB mass storage device.
- Rotary dial control, full graphic display, simple and easy to use.

MEGGER MIT 1525-UK HIGH VOLTAGE DC INSULATION RESISTANCE TESTER - 15KV

Offering CAT IV safety, the MIT1525 is a compact, light 15 kV insulation resistance tester for the diagnostic testing and maintenance of high voltage electrical equipment. It benefits from the Megger dual case construction. Tough on the outside and fire retardant on the inside.

Features:

- Measures up to 30 TΩ
- PI, DAR, DD, SV and ramp test
- Improved productivity – operate from line power/mains if battery dead
- Li ion battery - extended capacity, rapid charge
- Advanced memory with time/date stamp
- CATIV 600 V safety rating

MEGGER DLRO2 DUCTER 2A LOW RESISTANCE OHMMETER

The DLRO2 series are tough, hand-held 2A low resistance ohmmeters. They are designed to provide fast, accurate, repeatable measurements, even in electrically noisy locations.

Features:

- Noise Rejection mode with Confidence Meter
- Manual and auto save results for export to USB
- 'Difference Meter' for quick data comparisons
- Use very long test leads at 1A using dedicated test mode
- Safely test the resistance of inductive loads at 1A
- <600 V active protection against inadvertent live connections without blowing a fuse

MEGGER KC50C AND KC100C WIND TURBINE LIGHTNING PROTECTION LOW CURRENT TEST LEAD SET (2A)

The new KC-C test leads take advantage of the long test lead mode on the new DLRO2. The DLRO2s ability to test with up to 3.2 total resistance at 1A means the new KC-C series of leads can be much smaller and lighter, a distinct safety enhancement when working at height.

Features:

- Designed to work with DLRO2
- Unique lightweight and versatile design ideal for difficult testing tasks
- Cable reels in two lengths KC100C (100 m) and KC50C (50 m)
- Allows easy and reliable measurement of lightning protection circuit resistance of tall structures

MEGGER KC50E WIND TURBINE LIGHTNING PROTECTION LOW CURRENT EXTENSION LEAD 50M

The KC50E is an extension reel to fit either the KC50C or KC100C lead sets. One end of the test lead is fitted with an IP54 rated male connector and the other is fitted with a female connector. When the two are joined and locked together the connector becomes IP68 rated.

In use the extension reel would be unwound first, the cable disconnected from the cable drum, and then connected to either a KC100C or KC50C. The cable can then continue to be paid out in the normal fashion.

- Test cable diameter 6 mm
- Length: 50 metres
- Weight: 4.42kg

MEGGER ELECTRODE KIT 1001-810

3-wire earth spike test set from Megger. Comes complete with 2 x earth test spikes, and 3 x reels (one red, one yellow, and one green). The green reel is terminated with a black test probe croc clip on one end and 4mm connector on the other. The red and yellow reels have a 4mm connector on one end and test probe on the other.

Compatible with:

Megger Multifunction Testers that support earth testing (MFT1731, MFT1735, MFT1741 and more).

Most other brands of multifunction testers that perform Earth Ground testing and have standard 4mm jacks.

A) MARTINDALE LOKKIT2PLUS DOMESTIC INSTALLER LOCK OUT KIT

Basic lock out kit is ideal for domestic installers, or those who don't need the numerous locks included in the more expensive kits.

The full 8 piece kit includes:

- Padlock with unique key (PAD11RD)
- Yellow MCB lock, 10mm clip (LOK10)
- Red MCB lock, 6mm clip (LOK11)
- Green mini MCB lock (LOK1)
- Yellow isolation lock (LOK2)
- "Equipment Locked Out tags" which can be written on (TAG4)
- Black marker pen (LOKMP)
- Soft carry case (TC55)

B) MARTINDALE LOKKITPRO ULTIMATE LOCK OUT KIT

The LOKKITPRO is the ultimate lock out kit enabling safe isolation procedures to be carried out in all types of facility. The kit comprises of 9 different locking devices for simple fitting to MCBs, RCBOs and fuse holders.

In addition:

- Padlock with unique key (PAD11RD) (C70-7323)
- Cartridge fuse isolation lock (LOK6)
- Cable lock-off (CABLOK)
- Hasp (LOKHASP25)
- Plunge locking piece (LOK15)
- Appliance lock out (PL13)
- MCB Isolation lock kit (LOKMCB 5 pieces)
- Slimline grey isolation lock (LOK7)
- Yellow MCB lock, 10mm clip (LOK10)
- Red MCB lock, 6mm clip (LOK11)
- "Equipment locked out" tags which can be written on (TAG4 pack of 5 tags)
- Black marker pen (LOKMP)
- TC68 soft carry case (TC68)

A) MARTINDALE LOK8 COMPACT MCB LOCK OFF DEVICE

LOK8 is a compact device which allows installation on breakers where access is impeded by test buttons or other obstructions and its width permits installation without interference with neighbouring breakers.

B) MARTINDALE PAD11 RED LOCK OUT PADLOCK

The PAD11RD is a Red plastic bodied padlock with a 6mm strong steel shackle and is also available in Yellow, Blue, Brown and Green.

Each padlock is supplied with two sets of self-adhesive warning labels indicating 'Do Not Remove Locked Out' and 'Property Of' for completion by the user. Padlock body width 45mm with a vertical shackle clearance – 38mm.

C) MARTINDALE LOK6W FUSE CARRIER SERVICE LOCK FOR HENLEY & LUCY CUT OUTS

The LOK6W is a locking off device for use on Henley and Lucy Service Cut Out fuse carrier holders. The extendable design also makes it suitable for larger Red Spot fuse holders rated at 63A and 100A and other similar designs.

The LOK6W is suitable for use with a wide range of locking padlocks with wire shackles up to 7mm in diameter, such as The PAD11RD (C00-7323).

MARTINDALE LOKKITGAS1 GAS ENGINEER LOCK OUT KIT

The LOKKITGAS1 enables gas service engineers to securely lock off circuits before carrying out work on appliances connected to the mains power supply.

The full 8 piece kit includes:

- Padlock with unique key (PAD1IRD) (C70-7323)
- LOKFS1 Universal fused spur isolation lock (LOKFS1)
- Yellow pushpin MCB lock, 10mm spacing (LOK10)
- Red pushpin MCB lock, 8mm spacing (LOK11)
- Black slim line isolation lock (LOK7)
- "Equipment Locked Out" tag which can be written on (TAG4)

STANDARD TERMS AND CONDITIONS OF BUSINESS

Mills Ltd. (the Supplier) agrees to supply goods/services to third parties (the Customer) on the following terms and conditions to the exclusion of any other terms and conditions and which may only be varied under the authority in writing of the Supplier. Read this page online at millsltd.com/terms-conditions

The customer's attention is drawn in particular to the provisions of clause 10.

1. Interpretation

1.1 Definitions:

Business Day: a day (other than a Saturday, Sunday or public holiday) when banks in London are open for business.

Conditions: the terms and conditions set out in this document as amended from time to time in accordance with clause 12.5.

Contract: the contract between the Supplier and the Customer for the sale and purchase of the Goods in accordance with these Conditions.

Customer: the person or firm who purchases the Goods from the Supplier.

Data Protection Legislation: the UK Data Protection Legislation and (for so long as and to the extent that the law of the European Union has legal effect in the UK) the GDPR and any other directly applicable European Union regulation relating to privacy.

Force Majeure Event: an event or circumstance beyond a party's reasonable control.

GDPR: General Data Protection Regulation (*EU* 2016/679).

Goods: the goods (or any part of them) set out in the Order.

Order: the Customer's order for the Goods, as set out in the Customer's written acceptance of the Supplier's quotation.

Specification: any specification for the Goods, including any related plans and drawings, that is agreed by the Customer and the Supplier.

Supplier: Mills Limited (registered in England and Wales with company number 00282704).

UK Data Protection Legislation: any data protection legislation from time to time in force in the UK including the Data Protection Act 1998 or 2018 or any successor legislation.

1.2 Interpretation:

(a) a reference to a statute or statutory provision is a reference to such statute or provision as amended or re-enacted. A reference to a statute or statutory provision includes any subordinate legislation made under that statute or statutory provision, as amended or re-enacted.

(b) any phrase introduced by the terms **including**, **include**, **in particular** or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

(c) a reference to **writing** or **written** includes faxes and emails.

2. Basis of contract

2.1 These Conditions apply to the Contract to the exclusion of any other terms that the Customer seeks to impose or incorporate, or which are implied by trade, custom, practice or course of dealing.

2.2 The Order constitutes an offer by the Customer to purchase the Goods in accordance with these Conditions. The Customer is responsible for ensuring that the terms of the Order and any applicable Specification submitted by the Customer are complete and accurate.

2.3 The Order shall only be deemed to be accepted when the Supplier issues a form of acknowledgement accepting the Order, at which point the Contract shall come into existence. At this time, the Customer shall also ensure it provides the Supplier with full details of the individual whom is authorised to accept service of the delivery. In the event the details of the individual changes, the Customer shall inform the Supplier immediately.

2.4 The Customer waives any right it might otherwise have to rely on any term endorsed upon, delivered with or contained in any documents of the Customer that is inconsistent with these Conditions.

2.5 Any samples, drawings, descriptive matter or advertising produced by the Supplier and any descriptions or illustrations contained in the Supplier's catalogues or brochures are produced for the sole purpose of giving an approximate idea of the Goods referred to in them. They shall not form part of the Contract nor have any contractual effect.

2.6 A quotation for the Goods given by the Supplier shall not constitute an offer. A quotation shall only be valid for a period of 30 calendar days from its date of issue.

3. Goods

3.1 The Goods are described in the Supplier's catalogue as modified by any applicable Specification.

3.2 The Customer shall indemnify the Supplier against all liabilities, costs, expenses, damages and losses (including any legal, indirect or consequential losses, loss of profit, loss of reputation and all interest, penalties and legal and other professional costs and expenses) suffered or incurred by the Supplier in connection with any claim made against the Supplier for actual or alleged infringement of a third party's intellectual property rights arising out of or in connection with the Supplier's use of the Specification. This clause 3.2 shall survive termination of the Contract.

3.3 The Supplier reserves the right to amend the Specification if required by any applicable statutory or regulatory requirements.

4. Delivery

4.1 The Supplier shall ensure that:

(a) each delivery of the Goods is accompanied by a delivery note that shows the date of the Order of despatch, all relevant Customer and Supplier reference numbers, the type and quantity of the Goods (including the code number of the Goods, where applicable), special storage instructions (if any) and, if the Goods are being delivered by instalments, the outstanding balance of Goods remaining to be delivered; and

(b) if the Supplier requires the Customer to return any packaging materials to the Supplier, that fact is clearly stated in the delivery note. The Customer shall make any such packaging materials available for collection at such times as the Supplier shall reasonably require. Returns of packaging materials shall be at the Supplier's expense.

4.2 The Supplier shall deliver the Goods to the location set out in the Order or such other location as the parties may agree, and shall be limited to the Supplier's premises (including any location) at any time after the Supplier notifies the Customer that the Goods are ready.

4.3 Delivery is completed on the completion of unloading of the Goods at the Delivery Location.

4.4 Any dates quoted for delivery are approximate only, and the time of delivery is not of the essence. The Supplier shall not be liable for any delay in delivery of the Goods that is caused by a Force Majeure Event or the Customer's failure to provide the Supplier with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.

4.5 If the Customer fails to accept or take delivery of the Goods within three Business Days of the Supplier notifying the Customer that the Goods are ready, then, except where such failure or delay is caused by a Force Majeure Event or the Supplier's failure to comply with its obligations under the Contract:

(a) delivery of the Goods shall be deemed to have been completed at 3.30pm on the third Business Day after the day on which the Supplier notified the Customer that the Goods were ready; and

(b) the Supplier shall store the Goods until they take place, and charge the Customer for all related costs and expenses (including insurance).

4.6 If four Business Days after the day on which the Supplier notified the Customer that the Goods were ready for delivery the Customer has not accepted delivery of them, the Supplier may resell or otherwise dispose of part or all of the Goods.

4.7 In the event of any deliveries of any cabinets, these will be made to the curb side delivery only (from reception or loading bay only). If the Customer would like two individuals of the Supplier to assist with the delivery, this will be at the cost of the Customer, such cost to be agreed prior to delivery and determined exclusively by the Supplier.

4.8 If the Supplier delivers up to and including 5% more or less than the quantity of Goods ordered the Customer may not reject them.

4.9 The Supplier may deliver the Goods by instalments, which shall be invoiced and paid for separately. Any delay in delivery or defect in an instalment shall not entitle the Customer to cancel any other instalment.

4.10 The Supplier will not be held responsible for any loss or damage to the Goods following completion of delivery to the Customer.

4.11 Where the Supplier uses the services of third party couriers for the delivery of Goods, the Supplier will not be held responsible for any fees incurred by the Customer as a result of a failed delivery of Goods.

4.12 Where the Supplier is able to offer next working day delivery for the delivery of Goods, the Customer must order the Goods:

- (a) before 5pm where the order is placed on Monday to Thursday inclusive; or
- (b) before 4pm where the order is placed on Friday; or
- (c) before 3pm where the order relates to pallet deliveries placed from Monday to Friday inclusive.

5. Quality

5.1 The Supplier warrants that Goods supplied will:

- (a) conform in all material respects with their description and any applicable Specification;
- (b) be free from material defects in design, material and workmanship; and
- (c) be of satisfactory quality (within the meaning of the Sale of Goods Act 1979); and
- (d) be fit for a purpose held out by the Supplier.

but no warranty is given for any particular purpose other than the purpose commonly applied or those specified by the manufacturer.

5.2 Subject to clause 5.3, if:

- (a) the Customer gives notice in writing to the Supplier during the warranty period within a reasonable time of discovery that some or all of the Goods do not comply with the warranty set out in clause 5.1;
- (b) the Supplier is given a reasonable opportunity of examining such Goods; and
- (c) the Customer (if asked to do so by the Supplier) returns such Goods to the Supplier's place of business at the Customer's cost;

the Supplier, once having had a reasonable opportunity to inspect the Goods and satisfy themselves they are defective, shall, at its option, repair or replace the defective Goods or refund the price of the defective Goods in full.

5.3 Before any goods are returned to the Supplier in accordance with clause 5.2, the Customer shall obtain a RMA number before returning the goods.

5.4 The Supplier reserves the right to refuse returns without a valid RMA number shown clearly on the exterior of the packaging. In such an event any items received will be returned to the Customer at the cost of the Customer.

5.5 The Supplier shall not be liable for the Goods' failure to comply with the warranty set out in clause 5.1 in any of the following events:

- (a) the Customer makes any further use of such Goods after giving notice in accordance with clause 5.2;
- (b) the defect arises because the Customer failed to follow the Supplier's oral or written instructions as to the storage, commissioning, installation, use and maintenance of the Goods or (if there are none) good trade practice regarding the same;
- (c) the defect arises as a result of the Supplier following any drawing, design or Specification supplied by the Customer;
- (d) the Customer alters or repairs such Goods without the written consent of the Supplier;
- (e) the defect arises as a result of fair wear and tear, willful damage, negligence, or abnormal storage or working conditions;
- (f) the Goods differ from their description as a result of changes made to ensure they comply with applicable statutory or regulatory requirements.

5.6 Except as provided in this clause 5, the Supplier shall have no liability to the Customer in respect of the Goods' failure to comply with the warranty set out in clause 5.1.

5.7 The terms implied by sections 13 to 15 of the Sale of Goods Act 1979 are, to the fullest extent permitted by law, excluded from the Contract.

5.8 These Conditions shall apply to any repaired or replacement Goods supplied by the Supplier.

6. Returns

6.1 In the event the Customer needs to return the Goods because of a mistake or negligence on the part of the Customer, the Supplier reserves the right to invoice the Customer in respect of any costs or expenses, whatsoever, arising together with a handling fee of the higher of £30 or 25% of the total value of the Goods. For such returns, the customer must again request a RMA number prior to returning the Goods and the Goods must not be damaged in any way whatsoever on the sole view of the Supplier, acting reasonably.

6.2 In the event the Customer requests the collection of the Goods of a mistake or negligence on the part of the Customer, the Supplier reserves the right to invoice the customer in respect of any costs or expenses associated with the collection the higher of £15 excluding VAT or such collection fee as the Supplier deems reasonable on their sole view with regard to the collection location and logistical requirements.

6.3 The Supplier will only accept the return or refund of Goods if defective and the provisions of this clause have been satisfied:

1.1.1. Any Goods claimed to be damaged or defective must be returned with the appropriate receipt or evidence of purchase within 3 working days of purchase.

1.1.2. Where it is agreed between the Supplier and Customer that the Goods were defective at the point of sale following an inspection of the Goods by the Supplier, the Supplier shall have the option to repair the Goods in the first instance or shall have the option to replace the Goods. This decision is at the sole discretion of the Supplier.

1.1.3. Where an inspection of Goods requested by the Customer reveals the Goods are in proper working order, the Supplier reserves the right to invoice the Customer £50 excluding VAT for the inspection works undertaken.

7. Title and risk

7.1 The risk in the Goods shall pass to the Customer on completion of delivery.

7.2 Title to the Goods shall not pass to the Customer until the Supplier receives payment in full (in cash or cleared funds) for the Goods and any other goods that the Supplier has supplied to the Customer, in which case title to the Goods shall pass at the time of payment of all such sums;

7.3 Unltd title to the Goods has passed to the Customer, the Customer shall:

- (a) store the Goods safely along with all other goods held by the Customer so that they remain readily identifiable as the Supplier's property;
- (b) not remove, deface or obscure any identifying mark or packaging on or relating to the Goods;
- (c) maintain the Goods in satisfactory condition and keep them insured against all risks for their full price from the date of delivery;

(d) notify the Supplier immediately if it becomes subject to any of the events listed in clause 8.1; and

(e) give the Supplier such information relating to the Goods as the Supplier may require from time to time.

CONTINUED OVERLEAF...

STANDARD TERMS AND CONDITIONS OF BUSINESS - CONTINUED

- 7.4 Subject to clause 6.5, the Customer may resell or use the Goods in the ordinary course of its business (but not otherwise) before the Supplier receives payment for the Goods. However, if the Customer resells the Goods before that time:
- it does so as principal and not as the Supplier's agent; and
 - title to the Goods shall pass from the Supplier to the Customer immediately before the time at which resale by the Customer occurs.
- 7.5 If before title to the Goods passes to the Customer the Customer becomes subject to any of the events listed in clause 9.1, without limiting any other right or remedy the Supplier may have:
- the Customer's right to resell the Goods or use them in the ordinary course of its business ceases immediately;
 - the Supplier may at any time:
 - require the Customer to deliver up all Goods in its possession that have not been resold, or irrevocably incorporated into another product; and
 - if the Customer fails to do so promptly, enter any premises of the Customer or of any third party where the Goods are stored in order to recover them.
- 7.6 Title to any Goods returned to the Supplier following a request for inspection by the Customer where believed the Goods to be faulty will pass back to the Supplier.
- 7.7 The Supplier recommends that all Goods should be unpacked and inspected prior to the Customer signing the delivery note. The Customer warrants that signature of the delivery note confirms that all the Goods noted on the delivery note have been delivered and received in good working order. A signed delivery note corresponding to the Customer's delivery address completes the delivery and the risk for the Goods will pass to the Customer.
- ### 8. Price and payment
- 8.1 The price of the Goods shall be the price set out in the Order, or, if no price is quoted, the price set out in the Supplier's published price list in force as at the date of delivery. The Supplier may, by giving notice to the Customer at any time 3 Business Days before delivery, increase the price of the Goods to reflect any increase in the cost of the Goods that is due to:
- any factor beyond the Supplier's control (including foreign exchange fluctuations, increases in taxes and duties, and increases in labour, materials and other manufacturing costs);
 - any request by the Customer to change the delivery date(s), quantities or types of Goods ordered, or the Specification; or
 - any delay caused by any instructions of the Customer or failure of the Customer to give the Supplier adequate or accurate information or instructions.
- 8.2 The price of the Goods:
- excludes amounts in respect of value added tax (VAT), which the Customer shall additionally be liable to pay to the Supplier at the prevailing rate, subject to the receipt of a valid VAT invoice; and
 - excludes the costs and charges of packaging, insurance and transport of the Goods, which shall be invoiced to the Customer.
- 8.3 The Supplier may invoice the Customer for the Goods on or at any time after the completion of delivery.
- 8.4 The Customer shall pay the invoice in full and in cleared funds within 30 days of the date of the invoice. Payment shall be by bank transfer to the account nominated by the Supplier. Time for payment is of the essence. If the Customer fails to make any payment due to the Supplier under the Contract by the due date for payment, then the Customer shall pay interest on the overdue amount at the rate of 8% per annum above Lloyds bank base rate from time to time. Such interest shall accrue on a daily basis from the due date until actual payment of the overdue amount, whether before or after judgment. The Customer shall pay the interest together with the overdue amount.
- 8.5 The Customer shall pay all amounts due under the Contract in full without any set-off, counterclaim, deduction or withholding (except for any deduction or withholding required by law). The Supplier may at any time, without limiting any other rights or remedies it may have, set off any amount owing to it by the Customer against any amount payable by the Supplier to the Customer.
- ### 9. Termination
- 9.1 Without limiting its other rights or remedies, the Supplier may terminate this Contract with immediate effect by giving written notice to the Customer if:
- the Customer commits a material breach of any term of the Contract and (if such a breach is remediable) fails to remedy that breach within 5 days of that party being notified in writing to do so;
 - the Customer takes any step in action in connection with its entering administration, provisional liquidation or any composition or arrangement with its creditors (other than in relation to a solvent restructuring), being wound up (whether voluntarily or by order of the court, unless for the purpose of a solvent restructuring), having a receiver appointed to any of its assets or ceasing to carry on business or, if the step or action is taken in another jurisdiction, in connection with any analogous procedure in the relevant jurisdiction;
 - the Customer suspends, threatens to suspend, ceases or threatens to cease to carry on all or a substantial part of its business; or
 - the Customer's financial position deteriorates to such an extent that in the Supplier's opinion the Customer's capability to adequately fulfil its obligations under the Contract has been placed in jeopardy.
- 9.2 The Supplier, acting reasonably, is unable to fulfil the Order.
- 9.2 Without limiting its other rights or remedies, the Supplier may suspend provision of the Goods under the Contract or any other contract between the Customer and the Supplier if the Customer becomes subject to any of the events listed in clause 9.1 (a) to clause 9.1 (d), or the Supplier reasonably believes that the Customer is about to become subject to any of them, or if the Customer fails to pay any amount due under this Contract on the due date for payment.
- 9.3 Without limiting its other rights or remedies, the Supplier may terminate the Contract with immediate effect by giving written notice to the Customer if the Customer fails to pay any amount due under the Contract on the due date for payment.
- 9.4 On termination of the Contract for any reason the Customer shall immediately pay to the Supplier all of the Supplier's outstanding unpaid invoices and interest.
- 9.5 Termination of the Contract shall not affect any of the parties' rights and remedies that have accrued as at termination, including the right to claim damages in respect of any breach of this Contract that existed at or before the date of termination.
- 9.6 Any provision of the Contract that expressly or by implication is intended to come into or continue in force on or after termination shall remain in full force and effect.
- ### 10. Limitation of liability
- 10.1 Nothing in these Conditions shall limit or exclude the Supplier's liability for:
- death or personal injury caused by its negligence, or the negligence of its employees, agents or subcontractors (as applicable);
 - fraud or fraudulent misrepresentation;
 - breach of the terms implied by section 12 of the Sale of Goods Act 1979; [or]
 - defective products under the Consumer Protection Act 1987; or]
- (i) any matter in respect of which it would be unlawful for the Supplier to exclude or restrict liability.
- 10.2 Subject to clause 9.1:
- the Supplier shall under no circumstances whatsoever be liable to the Customer, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, for loss of profit, or any indirect or consequential loss arising under or in connection with the Contract; and
 - the Supplier's total liability to the Customer in respect of all other, save for matters arising from environmental matters where the Customer accepts liability, losses arising under or in connection with the Contract, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, shall in no circumstances exceed the price of the Goods.
- 10.3 Customers have a duty to use/operate all Goods supplied in accordance with manufacturers instructions
- for safe use and to ensure that such instructions are made readily available prior to the use of the Good by any individual.
- ### 11. Force majeure
- Neither party shall be in breach of this Contract nor liable for delay in performing, or failure to perform, any of its obligations under this Contract if such delay or failure result from a Force Majeure Event. If the period of delay or non-performance continues for 4 weeks, the party not affected may terminate this Contract by giving 2 weeks written notice to the affected party.
- ### 12. General
- #### 12.1 Assignment and other dealings.
- The Supplier may at any time assign, transfer, mortgage, charge, subcontract or deal in any other manner with all or any of its rights or obligations under the Contract.
 - The Customer may not assign, transfer, mortgage, charge, subcontract, declare a trust over or deal in any other manner with any or all of its rights or obligations under the Contract without the prior written consent of the Supplier.
- #### 12.2 Confidentiality.
- Each party undertakes that it shall not at any time disclose to any person any confidential information concerning the business, affairs, customers, clients or suppliers of the other party or of any member of the group to which the other party belongs, except as permitted by clause 12.2 (b). For the purposes of this clause, **group** means, in relation to a party, that party, any subsidiary or holding company from time to time of that party, and any subsidiary from time to time of a holding company of that party.
 - Each party may disclose the other party's confidential information:
 - to its employees, officers, representatives or advisers who need to know such information for the purposes of exercising the party's rights or carrying out its obligations under or in connection with this agreement. Each party shall ensure that its employees, officers, representatives or advisers to whom it discloses the other party's confidential information comply with this clause 12.2; and
 - (ii) as may be required by law, a court of competent jurisdiction or any governmental or regulatory authority.
 - No party shall use any other party's confidential information for any purpose other than to exercise its rights and perform its obligations under or in connection with this agreement.
- #### 12.3 Trademarks.
- The Customer shall not tamper with, alter the face or remove any of the names, logos or marks affixed to or marked on the goods or allow anyone else to do so. All Trademarks are acknowledged and belong to the Seller.
- #### 12.4 Entire agreement.
- This Contract constitutes the entire agreement between the parties and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between them, whether written or oral, relating to its subject matter.
 - Each party agrees that it shall have no remedies in respect of any statement, representation, assurance or warranty (whether made innocently or negligently) that is not set out in this agreement. Each party agrees that it shall have no claim for innocent or negligent misrepresentation or negligent misstatement based on any statement in this agreement.
- 12.5 Mills Limited web account Customers will receive a password and account number upon completion of the registration process. All such information provided is confidential to the Customer and must be shared with anyone whom it is not the Customer or the Supplier. The Customer agrees to indemnify the Supplier of any unauthorised use of the password or account number and any other breach of security.
- 12.6 The Customer shall also ensure they sign out of their Mills Limited web account after every session and agrees to indemnify the Supplier of any unauthorised use of the password or account number and any other breach of security.
- 12.7 **Variation.** No variation of this Contract shall be effective unless it is in writing and signed by the parties (or their authorised representatives).
- 12.8 **Waiver.** No failure or delay by a party to exercise any right or remedy provided under the Contract or by law shall constitute a waiver of that or any other right or remedy, nor shall it prevent or restrict the further exercise of that or any other right or remedy. No single or partial exercise of such right or remedy shall prevent or restrict the further exercise of that or any other right or remedy.
- 12.9 **Severance.** If any provision or part-provision of the Contract is or becomes invalid, illegal or unenforceable, it shall be deemed modified to the minimum extent necessary to make it valid, legal and enforceable. If such modification is not possible, the relevant provision or part-provision shall be deemed deleted. Any modification to or deletion of a provision or part-provision under this clause shall not affect the validity and enforceability of the rest of the Contract.
- ### 12.10 Notices.
- Any notice or other communication given to a party under or in connection with the Contract shall be in writing, addressed to that party at its registered office (if it is a company) or its principal place of business (in any other case) or such other address as that party may have specified to the other party in writing in accordance with this clause, and shall be delivered personally, sent by pre-paid first class post or other next working day delivery service, commercial courier, or fax.
 - A notice or other communication shall be deemed to have been received: if delivered personally, when left at the address referred to in clause 12.10 (a); if sent by pre-paid first class post or other next working day delivery service, at 9.00 am on the second Business Day after posting; if delivered by commercial courier, on the date and at the time that the courier's delivery receipt is signed, or, if sent by fax, one Business Day after transmission.
- (c) The provisions of this clause shall not apply to the service of any proceedings or other documents in any legal action.
- 12.11 **Third party rights.** No one other than a party to this Contract shall have any right to enforce any of its terms.
- 12.12 **Governing law.** The Contract, and any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with it or its subject matter or formation, shall be governed by and construed in accordance with the law of England and Wales.
- 12.13 **Jurisdiction.** Each party irrevocably agrees that the courts of England and Wales shall have exclusive jurisdiction to settle any dispute or claim (including non-contractual disputes or claims) arising out of or in connection with this Contract or its subject matter or formation.
- ### 13. Data protection and data processing
- 13.1 Both parties will comply with all applicable requirements of the Data Protection Legislation. This clause 13 is in addition to, and does not relieve, remove or replace, a party's obligations under the Data Protection Legislation. In this clause 13, **Applicable Laws** means (for so long as and to the extent that they apply to the Supplier) the law of the European Union, the law of any member state of the European Union and/or Domestic UK Law; and **Domestic UK Law** means the UK Data Protection Legislation and any other law that applies in the UK.
- 13.2 The parties acknowledge that for the purposes of the Data Protection Legislation, the Customer is the data controller and the Supplier is the data processor (where Data Controller and Data Processor have the meanings as defined in the Data Protection Legislation).
